

RIVERNORTH FLEXIBLE MUNICIPAL INCOME FUND II, INC.

STATEMENT OF ADDITIONAL INFORMATION

RiverNorth Flexible Municipal Income Fund II, Inc. (the “Fund”) is a Maryland corporation that is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a diversified, closed-end management investment company. The Fund’s primary investment objective is current income exempt from regular U.S. Federal income taxes (but which may be includable in taxable income for purposes of the Federal alternative minimum tax). The Fund’s secondary investment objective is total return. RiverNorth Capital Management, LLC, the investment adviser of the Fund (“RiverNorth” or the “Adviser”), and MacKay Shields LLC, the subadviser of the Fund (“MacKay Shields” or the “Subadviser”), attempt to achieve the Fund’s investment objectives by allocating the Fund’s assets between two principal investment strategies: Tactical Municipal Closed-End Fund Strategy and Municipal Bond Income Strategy. See “Investment Objectives, Strategies and Policies—Principal Investment Strategies” in the Fund’s Prospectus (as defined below). There is no assurance that the Fund will achieve its investment objectives.

This Statement of Additional Information (“SAI”) relates to the Fund’s (i) shares of common stock, \$0.0001 par value per share (the “Common Shares” and holders of such Common Shares, “Common Shareholders”), (ii) shares of preferred stock (the “Preferred Shares”) and (iii) subscription rights to purchase Common Shares (“Rights” and, together with the Common Shares and Preferred Shares, “Securities”). This SAI is not a prospectus, but should be read in conjunction with the Prospectus dated February 27, 2024 (the “Prospectus”) and the applicable prospectus supplement. This SAI does not include all of the information that a prospective investor should consider before purchasing Securities. Investors should obtain and read the Prospectus and the applicable prospectus supplement prior to purchasing Securities. A copy of the Prospectus may be obtained without charge by calling the Fund at (844) 569-4750.

The Prospectus and this SAI omit certain of the information contained in the registration statement filed with the Securities and Exchange Commission (“SEC”), Washington, D.C. The Fund’s filings with the SEC are available to the public on the SEC’s website at www.sec.gov. Copies of these filings may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov. Capitalized terms used but not defined herein have the meanings ascribed to them in the Prospectus.

This Statement of Additional Information is dated February 27, 2024.

INVESTMENT RESTRICTIONS

Except as otherwise indicated, the Fund's investment policies are not fundamental and may be changed without a vote of Common Shareholders. There can be no assurance the Fund's investment objectives will be met.

Any investment restrictions herein that involve a maximum percentage of securities or assets shall not be considered to be violated unless an excess over the percentage occurs immediately after and is caused by an acquisition or encumbrance of securities or assets of, or borrowings by, the Fund. However, the asset coverage requirement applicable to borrowings will be maintained as required under the 1940 Act.

The Fund's primary investment objective and 80% policy (as set forth in the Prospectus) are considered fundamental. In addition, as a matter of fundamental policy, the Fund will not:

(1) with respect to 75% of its total assets, purchase any securities (other than Government securities (as defined in the 1940 Act) and securities issued by other investment companies), if, as a result, more than 5% of the Fund's total assets would then be invested in securities of any single issuer or if, as a result, the Fund would hold more than 10% of the outstanding voting securities of any single issuer;

(2) borrow money, except as permitted under the 1940 Act, as it may be amended, interpreted or modified from time to time by Congress or regulatory authorities having jurisdiction, including, for the avoidance of doubt, SEC staff interpretations;

(3) issue senior securities, except as permitted under the 1940 Act, as it may be amended, interpreted or modified from time to time by Congress or regulatory authorities having jurisdiction, including, for the avoidance of doubt, SEC staff interpretations;

(4) purchase any security if, as a result, 25% or more of the Fund's total assets (taken at current value) would be invested in any single industry or group of industries, except that the Fund's investments in Underlying Funds shall not be deemed to be investments in a single industry or group of industries, and except that this limitation shall not apply to municipal securities other than those municipal securities backed principally by the assets and revenues of non-governmental users. (For purposes of this restriction, governments and their political subdivisions are not members of any industry.);

(5) engage in the business of underwriting securities issued by others, except to the extent that the Fund may be deemed to be an underwriter in connection with the disposition of portfolio securities;

(6) purchase or sell real estate; *provided* that this restriction shall not prevent the Fund from investing in municipal securities secured by real estate or interests therein or foreclosing upon and selling such real estate or from managing and maintaining it in the interim;

(7) purchase or sell commodities, unless acquired as a result of ownership of securities or other instruments; *provided* that this restriction shall not prohibit the Fund from purchasing or selling options, futures contracts and related options thereon, forward contracts, swaps, caps, floors, collars and any other financial instruments or from investing in securities or other instruments backed by physical commodities or as otherwise permitted by the 1940 Act, as amended, interpreted or modified from time to time by Congress or regulatory authorities having jurisdiction, including, for the avoidance of doubt, SEC staff interpretations, or pursuant to an exemption or other relief applicable to the Fund from the provisions of the 1940 Act, as amended from time to time; or

(8) make loans, except as permitted under the 1940 Act, as it may be amended, interpreted or modified from time to time by Congress or regulatory authorities having jurisdiction, including, for the avoidance of doubt, SEC staff interpretations, or except as may be permitted by exemptive orders granted under the 1940 Act.

A fundamental policy may not be changed without the approval of a majority of the outstanding voting securities of the Fund which, under the 1940 Act and the rules thereunder and as used in this SAI, means the lesser of (1) 67% or more of the voting securities present at such meeting, if the holders of more than 50% of the outstanding voting securities of the Fund are present or represented by proxy, or (2) more than 50% of the outstanding voting securities of the Fund.

Fundamental Investment Restriction (1)

For the purpose of applying the limitation in fundamental investment restriction (1), an issuer shall be deemed the sole issuer of a security when its assets and revenues are separate from other governmental entities and its securities are backed only by its assets and revenues. Similarly, in the case of a non-governmental issuer, such as an industrial corporation or a privately owned or operated hospital, if the security is backed only by the assets and revenues of the non-governmental issuer, then such non-governmental issuer would be deemed to be the sole issuer. Where a security is also backed by the enforceable obligation of a superior or unrelated governmental or other entity (other than a bond insurer), it shall also be included in the computation of securities owned that are issued by such governmental or other entity. Where a security is guaranteed by a governmental entity or some other facility, such as a bank guarantee or letter of credit, such a guarantee or letter of credit would be considered a separate security and would be treated as an issue of such government, other entity or bank. When a municipal bond is insured by bond insurance, it shall not be considered a security that is issued or guaranteed by the insurer; instead, the issuer of such municipal bond will be determined in accordance with the principles set forth above. The foregoing restrictions do not limit the percentage of the Fund's assets that may be invested in municipal securities insured by any given insurer.

Fundamental Investment Restriction (2)

The 1940 Act permits the Fund to borrow money in an amount up to one-third of its total assets (including the amount borrowed) less its liabilities (not including any borrowings but including the fair market value at the time of computation of any other senior securities then outstanding). The Fund may also borrow an additional 5% of its total assets without regard to the foregoing limitation for temporary purposes such as clearance of portfolio transactions.

Practices and investments that may involve leverage but are not considered to be borrowings are not subject to the policy. For more information on leverage and the risks relating thereto, see "Risks—Structural Risk—Leverage Risk" in the Prospectus.

Fundamental Investment Restriction (3)

The ability of a closed-end fund ("CEF") to issue senior securities is severely circumscribed by complex regulatory constraints under the 1940 Act that restrict, for instance, the amount, timing, and form of senior securities that may be issued. Certain portfolio management techniques, such as reverse repurchase agreements, tender option bonds, credit default swaps, futures contracts, the purchase of securities on margin, short sales, or the writing of puts on portfolio securities, may be considered senior securities.

Under the 1940 Act, the issuance by the Fund of a senior security representing an indebtedness is subject to a requirement that provision is made that, (i) if on the last business day of each of 12 consecutive calendar months the asset coverage with respect to the senior security is less than 100%, the holders of such securities voting as a class shall be entitled to elect at least a majority of the Board of Directors of the Fund (the “Board of Directors”) with such voting right to continue until the asset coverage for such class of senior security is at least 110% on the last business day of each of 3 consecutive calendar months or, (ii) if on the last business day of each of 24 consecutive calendar months the asset coverage for such class of senior security is less than 100%, an event of default shall be deemed to have occurred.

Fundamental Investment Restriction (4)

The limitation in fundamental investment restriction (4) will apply to municipal securities if the payment of principal and interest for such securities is derived principally from a specific project associated with an issuer that is not a governmental entity or a political subdivision of a government, and in that situation the Fund will consider such municipal securities to be in an industry associated with the project. Although the Fund’s investments in Underlying Funds are not deemed to be investments in a particular industry, to the extent that the Fund is aware of the investments held by the Underlying Funds, the Fund will consider such information when determining compliance with fundamental investment restriction (4).

Fundamental Investment Restriction (7)

The ability of the Fund to invest directly in commodities, and in certain commodity-related securities and other instruments, is subject to significant limitations in order to enable the Fund to maintain its status as a regulated investment company under the Internal Revenue Code of 1986, as amended (the “Code”).

Fundamental Investment Restriction (8)

The 1940 Act does not prohibit a fund from making loans; however, SEC staff interpretations currently prohibit funds from lending more than one-third of their total assets, except through the purchase of debt obligations or the use of repurchase agreements. A repurchase agreement is an agreement to purchase a security, coupled with an agreement to sell that security back to the original seller on an agreed-upon date at a price that reflects current interest rates. The SEC frequently treats repurchase agreements as loans.

INVESTMENT POLICIES AND TECHNIQUES

The following describes certain investment practices and techniques in which the Fund may engage, and certain of the risks associated with such practices and techniques, and includes a discussion of the spectrum of investments that the Adviser and the Subadviser in their discretion may, but are not required to, use in managing the Fund’s assets. Certain risks may only apply to a particular investment strategy of the Fund, or may apply to both investment strategies. The following descriptions supplement the descriptions of the investment objectives, policies, strategies and risks as set forth in the Fund’s Prospectus.

These same investment practices or techniques may be used by the Underlying Funds in which the Fund invests (as described in the Prospectus) and, therefore, the risks described below may apply to the Underlying Funds as well. The Underlying Funds are not subject to the Fund’s investment policies and restrictions, and the Underlying Funds may invest their assets in securities and other instruments, and may use investment techniques and strategies, that are not described in the Prospectus.

Furthermore, it is possible that certain types of financial instruments or investment techniques described herein may not be available, permissible, economically feasible or effective for their intended purposes in all markets. Certain practices, techniques or instruments may not be principal activities of the Fund but, to the extent employed, could from time to time have a material impact on the Fund's performance.

Municipal Securities. Municipal securities are either general obligation or revenue bonds and typically are issued to finance public projects (such as roads or public buildings), to pay general operating expenses or to refinance outstanding debt.

Municipal securities may also be issued on behalf of private entities or for private activities, such as housing, medical and educational facility construction, or for privately owned industrial development and pollution control projects. General obligation bonds are backed by the full faith and credit, or taxing authority, of the issuer and may be repaid from any revenue source; revenue bonds may be repaid only from the revenues of a specific facility or source. The Fund and the Underlying Funds may also purchase municipal securities that represent lease obligations, municipal notes, pre-refunded municipal bonds, private activity bonds, tender option bonds and other forms of municipal bonds and securities.

Municipal securities of below investment grade quality (Ba/BB or below) are commonly referred to as junk bonds. Issuers of securities rated Ba/BB or B are regarded as having current capacity to make principal and interest payments but are subject to business, financial or economic conditions which could adversely affect such payment capacity. Municipal securities rated Baa or BBB or above are considered "investment grade" securities; municipal securities rated Baa are considered medium grade obligations that lack outstanding investment characteristics and have speculative characteristics, while municipal securities rated BBB are regarded as having adequate capacity to pay principal and interest. Municipal securities rated Aaa or AAA in which the Fund may invest may have been so rated on the basis of the existence of insurance guaranteeing the timely payment, when due, of all principal and interest. Municipal securities rated below investment grade quality are obligations of issuers that are considered predominately speculative with respect to the issuer's capacity to pay interest and repay principal according to the terms of the obligation and, therefore, carry greater investment risk, including the possibility of issuer default and bankruptcy and increased market price volatility. Municipal securities rated below investment grade tend to be less marketable than higher-quality securities because the market for them is less broad. The market for municipal securities unrated by any NRSRO is even narrower. During periods of thin trading in these markets, the spread between bid and asked prices is likely to increase significantly and the Fund may have greater difficulty selling its portfolio securities. The Fund will be more dependent on the Adviser's and the Subadviser's research and analysis when investing in these securities.

The Fund and the Underlying Funds may invest in distressed securities which are securities of issuers that may be experiencing financial difficulties, such as being in default on their obligations to pay principal or interest thereon when due or that are involved in bankruptcy or insolvency proceedings. The issuers of such securities may be in transition, out of favor, financially leveraged or troubled, or potentially troubled, and may be or have recently been involved in major strategic actions, restructurings, bankruptcy, reorganization or liquidation. These characteristics of these issuers can cause their securities to be particularly risky, although they also may offer the potential for high returns. These issuers' securities may be considered speculative, and the ability of the issuers to pay their debts on schedule could be affected by adverse interest rate movements, changes in the general economic climate, economic factors affecting a particular industry or specific developments within the issuers. Distressed securities frequently do not produce income while they are outstanding and may require the Fund to bear certain extraordinary expenses in order to protect and recover its investment. See "—Below Investment Grade Securities Risk."

Investments in lower rated or unrated securities may present special tax issues for the Fund to the extent that the issuers of these securities default on their obligations pertaining thereto, and the federal income tax consequences to the Fund as a holder of such distressed securities may not be clear.

The ratings of S&P, Moody's and Fitch represent their opinions as to the quality of the municipal securities they rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, municipal securities with the same maturity, coupon and rating may have different yields while obligations of the same maturity and coupon with different ratings may have the same yield.

During temporary defensive periods (e.g., times when, in the Adviser's or the Subadviser's opinion, temporary imbalances of supply and demand or other temporary dislocations in the tax-exempt securities market adversely affect the price at which long-term or intermediate-term Municipal Bonds are available), and in order to keep the Fund's cash fully invested, including the period during which the net proceeds of an offering are being invested, the Fund may invest any percentage of its net assets in short-term investments including high quality, short-term securities that may be either tax-exempt or taxable. Tax-exempt short-term investments include various obligations issued by state and local governmental issuers, such as tax-exempt notes (bond anticipation notes, tax anticipation notes and revenue anticipation notes or other such Municipal Bonds maturing in three years or less from the date of issuance) and municipal commercial paper. Taxable short-term investments of the Fund may include certificates of deposit issued by U.S. banks with assets of at least \$1 billion, or commercial paper or corporate notes, bonds or debentures with a remaining maturity of one year or less, or repurchase agreements. To the extent the Fund invests in taxable investments, the Fund will not at such times be in a position to achieve its investment objective of tax-exempt income.

The Fund may also invest in securities of other open- or closed-end investment companies that invest primarily in municipal bonds of the types in which the Fund may invest directly. See "—Investment Company Securities."

Obligations of issuers of municipal securities are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors. In addition, the obligations of such issuers may become subject to the laws enacted in the future by Congress, state legislatures or referenda extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations or upon municipalities to levy taxes. There is also the possibility that, as a result of legislation or other conditions, the power or ability of any issuer to pay, when due, the principal of, and interest on, its municipal securities may be materially affected.

Subject to the concentration limits of the Fund's investment policies and guidelines, the Fund may invest a significant portion of its total assets in certain sectors of the municipal securities market, such as hospitals and other health care facilities, charter schools and other private educational facilities, special taxing districts and start-up utility districts and private activity bonds including industrial development bonds on behalf of transportation companies such as airline companies, whose credit quality and performance may be more susceptible to economic, business, political, regulatory and other developments than other sectors of municipal issuers. If the Fund invests a significant portion of its total assets in one or more particular sectors, the Fund's performance may be subject to additional risk and variability. To the extent that the Fund focuses its total assets in the hospital and healthcare facilities sector, for example, the Fund will be subject to risks associated with such sector, including adverse government regulation and reduction in reimbursement rates, as well as government approval of products and services and intense competition. Securities issued with respect to special taxing districts will be subject to various risks, including real-estate development related risks and taxpayer concentration risk. Further, the fees, special taxes or tax allocations and other revenues established to secure the obligations of securities issued with respect to special taxing districts are generally limited as to the rate or amount that may be levied or assessed and are not subject to increase pursuant to rate covenants or municipal or corporate guarantees. Charter schools and other private educational facilities will be subject to various risks, including the reversal of legislation authorizing or funding charter schools, the failure to renew or secure a charter, the failure of a funding entity to appropriate necessary funds and competition from alternatives such as voucher programs. Issuers of municipal utility securities can be significantly affected by government regulation, financing difficulties, supply and demand of services or fuel and natural resource conservation. The transportation sector, including airports, airlines, ports and other transportation facilities, can be significantly affected by changes in the economy, fuel prices, labor relations, insurance costs and government regulation.

Municipal Leases and Certificates of Participation. Also included within the general category of municipal securities are municipal leases, certificates of participation in such lease obligations or installment purchase contract obligations (collectively, “Municipal Lease Obligations”) of municipal authorities or entities. Although a Municipal Lease Obligation does not constitute a general obligation of the municipality for which the municipality’s taxing power is pledged, a Municipal Lease Obligation is ordinarily backed by the municipality’s covenant to budget for, appropriate and make the payments due under the Municipal Lease Obligation. However, certain Municipal Lease Obligations contain “nonappropriation” clauses which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. In the case of a “non-appropriation” lease, the Fund’s ability to recover under the lease in the event of non-appropriation or default will be limited solely to the repossession of the leased property, without recourse to the general credit of the lessee, and disposition or releasing of the property might prove difficult. To the extent that the Fund invests directly in unrated municipal leases or participates in such leases, the credit quality rating and risk of cancellation of such unrated leases will be monitored on an ongoing basis. In order to reduce this risk, the Fund will only purchase Municipal Lease Obligations where the Adviser or Subadviser believes the issuer has a strong incentive to continue making appropriations until maturity.

Below Investment Grade Securities. The Fund and the Underlying Funds may invest in below investment grade securities, which are commonly referred to as “junk” or “high yield” securities. These securities are considered to be high-risk investments. The risks include the following:

Greater Risk of Loss. These securities are regarded as predominately speculative. There is a greater risk that issuers of lower-rated securities will default than issuers of higher-rated securities. Issuers of lower-rated securities generally are less creditworthy and may be highly indebted, financially distressed or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, below investment grade securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, the Fund would experience a decrease in income and a decline in the market value of its investments. The Fund also may incur additional expenses in seeking recovery from the issuer.

Sensitivity to Interest Rate and Economic Changes. The income and market value of lower-rated securities may fluctuate more than higher-rated securities. Although certain below investment grade securities may be less sensitive to interest rate changes than investment grade securities, below investment grade securities generally are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn.

Valuation Difficulties. It is often more difficult to value lower-rated securities than higher-rated securities. If an issuer’s financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower-rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower-rated securities, valuation of such investments is much more dependent on judgment than is the case with higher-rated securities.

Liquidity. There may be no established secondary or public market for investments in lower-rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher-rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, lower-rated securities may be required to be sold at substantial losses or retained indefinitely even where an issuer's financial condition is deteriorating.

Credit Quality. Credit quality of below investment grade securities can change suddenly and unexpectedly, and even recently-issued credit ratings may not fully reflect the actual risks posed by a particular below investment grade security.

New Legislation. Future legislation may have a possible negative impact on the market for below investment grade securities.

Borrowing. The Fund may borrow funds and/or issue preferred stock, notes or other debt securities to the extent permitted by the 1940 Act for investment and other purposes, such as to provide the Fund with liquidity. The Fund's use of leverage may include borrowing through a line of credit with a bank or other financial institution. In addition, the Fund may enter into derivative and other transactions that have the effect of leverage. Such other transactions may include investing in inverse floating rate securities issued by tender option bond trusts. Under the requirements of the 1940 Act, the Fund, immediately after any borrowing, must have an "asset coverage" of at least 300% (*i.e.*, such indebtedness may not exceed 33-1/3% of the value of the Fund's total assets including the amount borrowed). With respect to such borrowing, asset coverage means the ratio which the value of the total assets of the Fund, less all liabilities and indebtedness not represented by senior securities (as defined in the 1940 Act), bears to the aggregate amount of such borrowing represented by senior securities issued by the Fund. Under the 1940 Act, the Fund is also not permitted to issue preferred stock unless immediately after such issuance the total asset value of the Fund's portfolio is at least 200% of the liquidation value of the outstanding preferred stock (*i.e.*, such liquidation value may not exceed 50% of the Fund's total assets).

The use of borrowing and other leverage by the Fund involves special risk considerations that may not be associated with other funds having similar policies. Because substantially all of the Fund's assets fluctuate in value, whereas the interest obligation resulting from a borrowing may be fixed by the terms of the Fund's agreement with its lender, the net asset value ("NAV") per share of Common Shares of the Fund will tend to increase more when its portfolio securities increase in value and decrease more when its portfolio securities decrease in value than would otherwise be the case if the Fund did not use leverage. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when investment considerations would not favor such sales. The interest that the Fund must pay on borrowed money, together with any additional fees to establish and maintain a borrowing facility, are additional costs that will reduce or eliminate any net investment income and may also offset any potential capital gains. Unless appreciation and income, if any, on assets acquired with borrowed funds exceed the costs of borrowing, the use of leverage will diminish the investment performance of the Fund compared with what it would have been without leverage. See "Use of Leverage" and "Risks—Structural Risk—Leverage Risk" in the Fund's Prospectus.

Closed-End Funds. The Fund may invest in shares of CEFs offered in initial or secondary offerings or through purchasing shares in the secondary market. An initial public offering of CEF shares is typically distributed by a group of underwriters who retain a spread or underwriting commission based on the initial public offering price. Such shares are then listed for trading on an exchange and, in some cases, may be traded in other over-the-counter markets. Because the shares of CEFs cannot be redeemed upon demand to the issuer like the shares of an open-end fund, investors seek to buy and sell shares of CEFs in the secondary market. The Fund will incur normal brokerage costs on its secondary purchases similar to the expenses the Fund would incur for the purchase of securities of any other type of issuer in the secondary market.

The shares of many CEFs, after their initial public offering, frequently trade at a price per share that is less than the NAV per share, the difference representing the “market discount” of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many CEFs, as well as to the fact that the shares of CEFs are not redeemable by the holder upon demand to the issuer at the next determined NAV but, rather, are subject to supply and demand in the secondary market. A relative lack of secondary market purchasers of CEF shares also may contribute to such shares trading at a discount to their NAV.

The Fund may invest in shares of CEFs that are trading at a discount to NAV or at a premium to NAV. There can be no assurance that the market discount on shares of any CEF purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such CEFs, thereby adversely affecting the NAV of the Common Shares. Similarly, there can be no assurance that any shares of a CEF purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

CEFs may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the CEF’s common shares in an attempt to enhance the current return to such CEF’s common shareholders. The Fund’s investment in the common shares of CEFs that are financially leveraged may create an opportunity for greater total return on its investment, but in a down market may also lose money at a faster rate. In general, leveraged funds may be expected to exhibit more volatility in market price and NAV than an investment in shares of investment companies without a leveraged capital structure.

Derivatives. The Fund may utilize various other investment strategies as described below for a variety of purposes, such as hedging various market risks or enhancing return. These strategies may be executed through the use of derivative contracts. The Underlying Funds may also utilize derivative contracts and are thus subject to the same risks described below.

In the course of pursuing these investment strategies, the Fund may purchase and sell exchange-listed and over-the-counter put and call options on securities, equity and fixed-income indices and other instruments, purchase and sell futures contracts and options thereon, enter into various transactions such as swaps, caps, floors or collars, (collectively, all the above are called “Derivative Transactions”). In addition, Derivative Transactions may also include new techniques, instruments or strategies that are permitted as regulatory changes occur. Derivative Transactions may be used without limit (subject to certain limits imposed by the 1940 Act) to attempt to protect against possible changes in the market value of securities held in or to be purchased for the Fund’s portfolio resulting from securities markets fluctuations, to protect the Fund’s unrealized gains in the value of its portfolio securities, to facilitate the sale of such securities for investment purposes, to manage the effective maturity or duration of the Fund’s portfolio, or to establish a position in the derivatives markets as a substitute for purchasing or selling particular securities. Some Derivative Transactions may also be used to enhance potential gain. Any or all of these investment techniques may be used at any time and in any combination, and there is no particular strategy that dictates the use of one technique rather than another, as use of any Derivative Transaction is a function of numerous variables including, but not limited to, market conditions. The ability of the Fund to utilize these Derivative Transactions successfully will depend on the Adviser’s or Subadviser’s ability to predict pertinent market movements, which cannot be assured. The Fund’s use of Derivative Transactions may also be limited by the requirements of the Code for qualification as a regulated investment company for U.S. federal income tax purposes. The Fund will comply with applicable regulatory requirements when implementing these strategies, techniques and instruments. Derivative Transactions will not be used to alter fundamental investment purposes and characteristics of the Fund, and the Fund will cover its obligations under options, futures and swaps to limit leveraging of the Fund to the extent described in the Prospectus, the applicable Prospectus supplement and this SAI. Derivative Transactions, including derivative contracts, have risks associated with them including, but not limited to, possible default by the other party to the transaction, illiquidity and, to the extent the Adviser’s or Subadviser’s view as to certain market movements is incorrect, the risk that the use of such Derivative Transactions could result in losses greater than if they had not been used. Use of Derivative Transactions may result in losses to the Fund, force the sale or purchase of portfolio securities at inopportune times or for prices higher than or lower than current market values, limit the amount of appreciation the Fund can realize on its investments or cause the Fund to hold a security it might otherwise sell.

The use of options and futures transactions entails certain other risks. In particular, the variable degree of correlation between price movements of futures contracts and price movements in the related portfolio position of the Fund creates the possibility that losses on the hedging instrument may be greater than gains in the value of the position the Fund is attempting to hedge. In addition, futures and options markets may not be liquid in all circumstances and certain over-the-counter options may have no markets. As a result, in certain markets, the Fund might not be able to close out a transaction without incurring substantial losses, if at all. Although the use of futures and options transactions for hedging should tend to reduce the risk of loss due to a decline in the value of the hedged position, at the same time they tend to limit any potential gain which might result from an increase in value of such position. Finally, the daily variation margin requirements for futures contracts would create a greater ongoing potential financial risk than would purchases of options, where the exposure is limited to the cost of the initial premium. Losses resulting from the use of Derivative Transactions would reduce NAV, and possibly income, and such losses can be greater than if the Derivative Transactions had not been utilized.

On October 28, 2020, the SEC adopted Rule 18f-4 under the 1940 Act relating to a registered investment company's use of derivatives and related instruments. Rule 18f-4 prescribes specific value-at-risk leverage limits for certain derivatives users and requires certain derivatives users to adopt and implement a derivatives risk management program (including the appointment of a derivatives risk manager and the implementation of certain testing requirements), and prescribes reporting requirements in respect of derivatives. Subject to certain conditions, if a fund qualifies as a "limited derivatives user," as defined in Rule 18f-4, it is not subject to the full requirements of Rule 18f-4. In connection with the adoption of Rule 18f-4, the SEC rescinded certain of its prior guidance regarding asset segregation and coverage requirements in respect of derivatives transactions and related instruments. With respect to reverse repurchase agreements, tender option bonds or other similar financing transactions in particular, Rule 18f-4 permits a fund to enter into such transactions if the fund either (i) complies with the asset coverage requirements of Section 18 of the 1940 Act, and combines the aggregate amount of indebtedness associated with all tender option bonds or similar financing with the aggregate amount of any other senior securities representing indebtedness when calculating the relevant asset coverage ratio, or (ii) treats all tender option bonds or similar financing transactions as derivatives transactions for all purposes under Rule 18f-4. The Fund was required to comply with Rule 18f-4 beginning August 19, 2022 and has adopted procedures for investing in derivatives and other transactions in compliance with Rule 18f-4.

General Characteristics of Options. Put options and call options typically have similar structural characteristics and operational mechanics regardless of the underlying instrument on which they are purchased or sold. Thus, the following general discussion relates to each of the particular types of options discussed in greater detail below. A put option gives the purchaser of the option, upon payment of a premium, the right to sell, and the writer the obligation to buy, the underlying security, commodity, index or other instrument at the exercise price. For instance, the Fund's purchase of a put option on a security might be designed to protect its holdings in the underlying instrument (or, in some cases, a similar instrument) against a substantial decline in the market value by giving the Fund the right to sell such instrument at the option exercise price. A call option, upon payment of a premium, gives the purchaser of the option the right to buy, and the seller the obligation to sell, the underlying instrument at the exercise price. The Fund's purchase of a call option on a security, financial future, index or other instrument might be intended to protect the Fund against an increase in the price of the underlying instrument that it intends to purchase in the future by fixing the price at which it may purchase such instrument. An American style put or call option may be exercised at any time during the option period while a European style put or call option may be exercised only upon expiration or during a fixed period prior thereto. The Fund is authorized to purchase and sell exchange listed options and over-the-counter options ("OTC options"). Exchange listed options are issued by a regulated intermediary such as the Options Clearing Corporation ("OCC"), which guarantees the performance of the obligations of the parties to such options. The discussion below uses the OCC as an example, but is also applicable to other financial intermediaries.

With certain exceptions, OCC issued and exchange listed options generally settle by physical delivery of the underlying security, although in the future cash settlement may become available. Index options are cash settled for the net amount, if any, by which the option is “in-the-money” (*i.e.*, where the value of the underlying instrument exceeds, in the case of a call option, or is less than, in the case of a put option, the exercise price of the option) at the time the option is exercised. Frequently, rather than taking or making delivery of the underlying instrument through the process of exercising the option, listed options are closed by entering into offsetting purchase or sale transactions that do not result in ownership of the new option.

The Fund’s ability to close out its position as a purchaser or seller of an OCC or exchange listed put or call option is dependent, in part, upon the liquidity of the option market. Among the possible reasons for the absence of a liquid option market on an exchange are: (i) insufficient trading interest in certain options; (ii) restrictions on transactions imposed by an exchange; (iii) trading halts, suspensions or other restrictions imposed with respect to particular classes or series of options or underlying securities including reaching daily price limits; (iv) interruption of the normal operations of the OCC or an exchange; (v) inadequacy of the facilities of an exchange or OCC to handle current trading volume; or (vi) a decision by one or more exchanges to discontinue the trading of options (or a particular class or series of options), in which event the relevant market for that option on that exchange would cease to exist, although outstanding options on that exchange would generally continue to be exercisable in accordance with their terms.

The hours of trading for listed options may not coincide with the hours during which the underlying financial instruments are traded. To the extent that the option markets close before the markets for the underlying financial instruments, significant price and rate movements can take place in the underlying markets that cannot be reflected in the option markets.

OTC options are purchased from or sold to securities dealers, financial institutions or other parties (“Counterparties”) through direct bilateral agreement with the Counterparty. In contrast to exchange listed options, which generally have standardized terms and performance mechanics, all the terms of an OTC option, including such terms as method of settlement, term, exercise price, premium, guarantees and security, are set by negotiation of the parties. The Fund will only sell OTC options that are subject to a buy-back provision permitting the Fund to require the Counterparty to sell the option back to the Fund at a formula price within seven days. The Fund expects generally to enter into OTC options that have cash settlement provisions, although it is not required to do so.

Unless the parties provide for it, there is no central clearing or guaranty function in an OTC option. As a result, if the Counterparty fails to make or take delivery of the security or other instrument underlying an OTC option it has entered into with the Fund or fails to make a cash settlement payment due in accordance with the terms of that option, the Fund will lose any premium it paid for the option as well as any anticipated benefit of the transaction. Accordingly, the Adviser or Subadviser, as applicable, must assess the creditworthiness of each such Counterparty or any guarantor or credit enhancement of the Counterparty's credit to determine the likelihood that the terms of the OTC option will be satisfied. The Fund will engage in OTC option transactions only with U.S. government securities dealers recognized by the Federal Reserve Bank of New York as "primary dealers" or broker/dealers, domestic or foreign banks or other financial institutions which have received (or the guarantors of the obligation of which have received) a short-term credit rating of "A-1" from S&P Global Ratings ("S&P") or "P-1" from Moody's Investor Services, Inc. ("Moody's") or an equivalent rating from any nationally recognized statistical rating organization ("NRSRO") or, in the case of OTC currency options, are determined to be of equivalent credit quality by the Adviser or Subadviser, as applicable. The staff of the SEC currently takes the position that OTC options purchased by the Fund, and portfolio securities "covering" the amount of the Fund's obligation pursuant to an OTC option sold by it (the cost of the sell-back plus the in-the-money amount, if any) are illiquid.

If the Fund sells a call option, the premium that it receives may serve as a partial hedge, to the extent of the option premium, against a decrease in the value of the underlying securities or instruments in its portfolio or will increase the Fund's income. The sale of put options can also provide income.

The Fund may purchase and sell call options on securities including U.S. Treasury and agency securities, corporate debt securities and equity securities (including convertible securities) that are traded on U.S. securities exchanges and in the over-the-counter markets, and on securities indices and futures contracts. All calls sold by the Fund must be "covered" (*i.e.*, the Fund must own the securities or futures contract subject to the call). Even though the Fund will receive the option premium to help protect it against loss, a call sold by the Fund exposes the Fund during the term of the option to possible loss of opportunity to realize appreciation in the market price of the underlying security or instrument and may require the Fund to hold a security or instrument which it might otherwise have sold.

The Fund may purchase and sell put options on securities including U.S. Treasury and agency securities, corporate debt securities and equity securities (including convertible securities), whether or not it holds the above securities in its portfolio, and on securities indices and futures contracts other than futures on individual corporate debt and individual equity securities. In selling put options, there is a risk that the Fund may be required to buy the underlying security at a disadvantageous price above the market price.

General Characteristics of Futures. The Fund may enter into futures contracts or purchase or sell put and call options on such futures as a hedge against anticipated interest rate or equity market changes or to enhance returns. Futures are generally bought and sold on the commodities exchanges where they are listed with payment of initial and variation margin as described below. The sale of a futures contract creates a firm obligation by the Fund, as seller, to deliver to the buyer the specific type of financial instrument called for in the contract at a specific future time for a specified price (or, with respect to index futures, the net cash amount). Options on futures contracts are similar to options on securities except that an option on a futures contract gives the purchaser the right in return for the premium paid to assume a position in a futures contract and obligates the seller to deliver such position.

Typically, maintaining a futures contract or selling an option thereon requires the Fund to deposit with a financial intermediary as security for its obligations an amount of cash or other specified assets (initial margin), which initially is typically 1% to 10% of the face amount of the contract (but may be higher in some circumstances). Additional cash or assets (variation margin) may be required to be deposited thereafter on a daily basis as the mark-to-market value of the contract fluctuates. The purchase of an option on financial futures involves payment of a premium for the option without any further obligation on the part of the Fund. If the Fund exercises an option on a futures contract it will be obligated to post initial margin (and potential subsequent variation margin) for the resulting futures position just as it would for any position. Futures contracts and options thereon are generally settled by entering into an offsetting transaction but there can be no assurance that the position can be offset prior to settlement at an advantageous price, nor that delivery will occur.

Options on Securities Indices and Other Financial Indices. The Fund also may purchase and sell call and put options on securities indices and other financial indices and in so doing can achieve many of the same objectives it would achieve through the sale or purchase of options on individual securities or other instruments. Options on securities indices and other financial indices are similar to options on a security or other instrument except that, rather than settling by physical delivery of the underlying instrument, they settle by cash settlement, *i.e.*, an option on an index gives the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the index upon which the option is based exceeds, in the case of a call, or is less than, in the case of a put, the exercise price of the option (except if, in the case of an OTC option, physical delivery is specified). This amount of cash is equal to the excess of the closing price of the index over the exercise price of the option, which also may be multiplied by a formula value. The seller of the option is obligated, in return for the premium received, to make delivery of this amount. The gain or loss on an option on an index depends on price movements in the instruments making up the market, market segment, industry or other composite on which the underlying index is based, rather than price movements in individual securities, as is the case with respect to options on securities.

Swaps, Caps, Floors and Collars. Among the Derivative Transactions into which the Fund may enter are interest rate, index and other swaps and the purchase or sale of related caps, floors and collars. The Fund expects to enter into these transactions primarily to preserve a return or spread on a particular investment or portion of its portfolio, as a duration management technique or to protect against any increase in the price of securities the Fund anticipates purchasing at a later date. The Fund will not sell interest rate caps or floors where it does not own securities or other instruments providing the income stream the Fund may be obligated to pay. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest, *e.g.*, an exchange of floating rate payments for fixed rate payments with respect to a notional amount of principal. An index swap is an agreement to swap cash flows on a notional amount based on changes in the values of the reference indices. The purchase of a cap entitles the purchaser to receive payments on a notional principal amount from the party selling such cap to the extent that a specified index exceeds a predetermined interest rate or amount. The purchase of a floor entitles the purchaser to receive payments on a notional principal amount from the party selling such floor to the extent that a specified index falls below a predetermined interest rate or amount. A collar is a combination of a cap and a floor that preserves a certain return within a predetermined range of interest rates or values.

The Fund will usually enter into swaps on a net basis, *i.e.*, the two payment streams are netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. The Fund believes such obligations do not, as of the date of this SAI, constitute senior securities under the 1940 Act and, accordingly, will not treat them as being subject to its borrowing restrictions. If there is a default by the Counterparty, the Fund may have contractual remedies pursuant to the agreements related to the transaction.

Credit Default Swap Agreements. The Fund may enter into credit default swap agreements. The “buyer” in a credit default contract is obligated to pay the “seller” a periodic stream of payments over the term of the contract *provided* that no event of default on an underlying reference obligation has occurred. If an event of default occurs, the seller must pay the buyer the full notional value, or “par value,” of the reference obligation. Credit default swap transactions are either “physical delivery” settled or “cash” settled. Physical delivery entails the actual delivery of the reference asset to the seller in exchange for the payment of the full par value of the reference asset. Cash settled entails a net cash payment from the seller to the buyer based on the difference of the par value of the reference asset and the current value of the reference asset that may have, through default, lost some, most or all of its value. The Fund may be either the buyer or seller in a credit default swap transaction. If the Fund is a buyer and no event of default occurs, the Fund will have made a series of periodic payments and recover nothing of monetary value. However, if an event of default occurs, the Fund (if the buyer) will receive the full notional value of the reference obligation either through a cash payment in exchange for the asset or a cash payment in addition to owning the reference assets. As a seller, the Fund receives a fixed rate of income throughout the term of the contract, which typically is between six months and five years, *provided* that there is no event of default. If an event of default occurs, the seller must pay the buyer the full notional value of the reference obligation.

Credit default swap transactions involve greater risks than if the Fund had invested in the reference obligation directly. In addition to general market risks, credit default swaps are subject to liquidity risk, counterparty risk and credit risks, each as further described below. Moreover, if the Fund is a buyer, it will lose its investment and recover nothing should no event of default occur. If an event of default were to occur, the value of the reference obligation received by the seller, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund. When the Fund acts as a seller of a credit default swap agreement it is exposed to the risks of leverage since if an event of default occurs the seller must pay the buyer the full notional value of the reference obligation.

A credit default index swap is a swap on an index of credit default swaps. Credit default index swaps allow an investor to manage credit risk or to take a position on a basket of credit default swaps (or other instruments) in a more efficient manner than transacting in single name credit default swaps. If a credit event occurs in one of the underlying companies, the protection is paid out via the delivery of the defaulted bond by the buyer of protection in return for payment of the notional value of the defaulted bond by the seller of protection or it may be settled through a cash settlement between the two parties. The underlying company is then removed from the index.

Structured Notes. Structured notes are derivative debt securities, the interest rate or principal of which is determined by reference to changes in value of a specific security, reference rate, or index. Indexed securities, similar to structured notes, are typically, but not always, debt securities whose value at maturity or coupon rate is determined by reference to other securities. The performance of a structured note or indexed security is based upon the performance of the underlying instrument, but may involve a formula that multiplies the effect of certain aspects of the performance of that instrument, so that the performance of the derivative is more or less volatile than that of the underlying instrument, but may involve a formula that multiplies the effect of certain aspects of the performance of that instrument, so that the performance of the derivative is more or less volatile than that of the underlying instrument.

The terms of a structured note may provide that, in certain circumstances, no principal is due on maturity and, therefore, may result in loss of investment. Structured notes may be indexed positively or negatively to the performance of the underlying instrument such that the appreciation or depreciation of the underlying instrument will move in the same direction as the value of the structured note at maturity or of any coupon payment. In addition, changes in the interest rate and value of the principal at maturity may be fixed at a specific multiple of the change in value of the underlying instrument, making the value of the structured note more volatile than the underlying instrument. In addition, structured notes may be less liquid and more difficult to price accurately than less complex securities or traditional debt securities.

Commodity-Linked Derivatives. The Fund may invest in instruments with principal and/or coupon payments linked to the value of commodities, commodity futures contracts, or the performance of commodity indices such as “commodity-linked” or “index-linked” notes. These instruments are sometimes referred to as “structured notes” because the terms of the instrument may be structured by the issuer of the note and the purchaser of the note, such as the Fund.

The values of these notes will rise and fall in response to changes in the underlying commodity or related index or investment. These notes expose the Fund economically to movements in commodity prices, but a particular note has many features of a debt obligation. These notes also are subject to credit and interest rate risks that in general affect the value of debt securities. Therefore, at the maturity of the note, the Fund may receive more or less principal than it originally invested. The Fund might receive interest payments on the note that are more or less than the stated coupon interest rate payments.

Structured notes may involve leverage, meaning that the value of the instrument will be calculated as a multiple of the upward or downward price movement of the underlying commodity future or index. The prices of commodity-linked instruments may move in different directions than investments in traditional equity and debt securities in periods of rising inflation, which may provide the Fund with a desired degree of diversity. Of course, there can be no guarantee that the Fund’s commodity-linked investments would not be correlated with traditional financial assets under any particular market conditions.

Commodity-linked notes may be issued by U.S. and foreign banks, brokerage firms, insurance companies and other corporations. These notes, in addition to fluctuating in response to changes in the underlying commodity assets, will be subject to credit and interest rate risks that typically affect debt securities.

The commodity-linked instruments may be wholly principal protected, partially principal protected or offer no principal protection. With a wholly principal protected instrument, the Fund will receive at maturity the greater of the par value of the note or the increase in value of the underlying index. Partially protected instruments may suffer some loss of principal up to a specified limit if the underlying index declines in value during the term of the instrument. For instruments without principal protection, there is a risk that the instrument could lose all of its value if the index declines sufficiently. The Adviser’s or Subadviser’s decision on whether and to what extent to use principal protection depends in part on the cost of the protection. In addition, the ability of the Fund to take advantage of any protection feature depends on the creditworthiness of the issuer of the instrument.

Commodity-linked derivatives are generally hybrid instruments which are excluded from regulation under the Commodity Exchange Act (the “CEA”) and the rules thereunder. Additionally, from time to time the Fund may invest in other hybrid instruments that do not qualify for exemption from regulation under the CEA.

Combined Transactions. The Fund may enter into multiple transactions, including multiple options transactions, multiple futures transactions, multiple currency transactions (including forward currency contracts) and multiple interest rate transactions and any combination of futures, options, currency and interest rate transactions (“component” transactions), instead of a single Derivative Transaction, as part of a single or combined strategy when, in the opinion of the Adviser or Subadviser, it is in the best interests of the Fund to do so. A combined transaction will usually contain elements of risk that are present in each of its component transactions. Although combined transactions are normally entered into based on the Adviser’s or Subadviser’s judgment that the combined strategies will reduce risk or otherwise more effectively achieve the desired portfolio management goal, it is possible that the combination will instead increase such risks or hinder achievement of the portfolio management objectives.

Regulation as a "Commodity Pool." CFTC Rule 4.5 requires operators of registered investment companies to either limit such investment companies' use of futures, options on futures and swaps or register as a commodity pool operator ("CPO") and submit to dual regulation by the CFTC and the SEC. In order to be able to comply with the exclusion from the CPO definition pursuant to CFTC Rule 4.5 with respect to the Fund, the Adviser must limit the Fund's transactions in commodity futures, commodity option contracts and swaps for non-hedging purposes by either (a) limiting the aggregate initial margin and premiums required to establish non-hedging commodities positions to not more than 5% of the liquidation value of the Fund's portfolio after taking into account unrealized profits and losses on any such contract or (b) limiting the aggregate net notional value of non-hedging commodities positions to not more than 100% of the liquidation value of the Fund's portfolio after taking into account unrealized profits and losses on such positions. In the event that the Fund's investments in such instruments exceed such thresholds, the Adviser would no longer be excluded from the CPO definition and may be required to register as a CPO, and the Subadviser may be required to register as a commodity trading advisor ("CTA"). In the event the Adviser or Subadviser is required to register as a CPO or CTA, as applicable, it will become subject to additional recordkeeping and reporting requirements with respect to the Fund. The Adviser has claimed an exclusion from the definition of a CPO with respect to the Fund under the amended rules. The Fund reserves the right to engage in transactions involving futures, options thereon and swaps in accordance with the Fund's policies. The Fund does not anticipate that it will invest in commodity futures, commodity options contracts and swaps to an extent or in a manner that would require the Adviser and the Subadviser to register as a CPO or CTA (as applicable) in connection with their management of the Fund.

Exchange-Traded Funds. To the extent the Fund invests a portion of its Managed Assets (as defined below) in exchange-traded funds ("ETFs"), those assets will be subject to the risks of the purchased funds' portfolio securities, and a Shareholder will bear not only his or her proportionate share of the Fund's expenses, but also indirectly the expenses of the purchased funds. Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other funds. The Fund's investments in other funds also are subject to the ability of the managers of those funds to achieve the funds' investment objective(s).

Risks associated with investments in ETFs may generally include the risks described in the Prospectus associated with the Fund's structure as a CEF, including market risk. Most ETFs are investment companies that aim to track or replicate a desired index, such as a sector, market or global segment. Most ETFs are passively managed and their shares are traded on a national exchange. ETFs do not sell individual shares directly to investors and only issue their shares in large blocks known as "creation units." The investor purchasing a creation unit may sell the individual shares on a secondary market. Therefore, the liquidity of ETFs depends on the adequacy of the secondary market. There can be no assurance that an ETF's investment objective(s) will be achieved, as ETFs based on an index may not replicate and maintain exactly the composition and relative weightings of securities in the index. ETFs are subject to the risks of investing in the underlying securities. ETF shares may trade at a premium or discount to their NAV. As ETFs trade on an exchange, they are subject to the risks of any exchange-traded instrument, including: (i) an active trading market for its shares may not develop or be maintained, (ii) trading of its shares may be halted by the exchange, and (iii) its shares may be delisted from the exchange. Some ETFs are highly leveraged and therefore will expose the Fund to risks posed by leverage, including the risk that the use of leverage by an ETF can magnify the effect of any of its losses.

The Fund may invest in a range of ETFs. When the Fund invests in sector ETFs, there is a risk that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a particular sector, the value of its Common Shares may be especially sensitive to factors and economic risks that specifically affect that sector. As a result, the Fund's Common Share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of industries. Additionally, some sectors could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those sectors may have a material effect on the value of securities issued by companies in those sectors. The sectors in which the Fund may be more heavily invested will vary.

There is a risk that the underlying ETFs in which the Fund invests may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Fund may invest may be granted licenses by agreement to use the indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may terminate if such license agreements are terminated. In addition, an ETF may terminate if its entire NAV falls below a certain amount. Although the Fund believes that, in the event of the termination of an underlying ETF they will be able to invest instead in shares of an alternate ETF tracking the same market index or another market index with the same general market, there is no guarantee that shares of an alternate ETF would be available for investment at that time. To the extent the Fund invests in a sector product, the Fund will be subject to the risks associated with that sector.

High Yield Securities. The Fund and the Underlying Funds may invest in high yield securities. High yield, high risk bonds are securities that are generally rated below investment grade by the primary rating agencies (BB+ or lower by S&P and Ba1 or lower by Moody's). Other terms used to describe such securities include "lower rated bonds," "non-investment grade bonds," "below investment grade bonds," and "junk bonds." These securities are considered to be high-risk investments.

Illiquid Securities and Restricted Securities. Certain securities may be subject to legal or contractual restrictions on resale ("restricted securities"). Generally speaking, restricted securities may be sold: (i) only to qualified institutional buyers; (ii) in a privately negotiated transaction to a limited number of purchasers; (iii) in limited quantities after they have been held for a specified period of time and other conditions are met pursuant to an exemption from registration; or (iv) in a public offering for which a registration statement is in effect under the Securities Act of 1933, as amended ("1933 Act"). Issuers of restricted securities may not be subject to the disclosure and other investor protection requirements that would be applicable if their securities were publicly traded.

Restricted securities are often illiquid, but they may also be liquid. For example, restricted securities that are eligible for resale under Rule 144A are often deemed to be liquid. The Fund and Underlying Funds may also purchase securities that are not subject to legal or contractual restrictions on resale, but that are deemed illiquid. Such securities may be illiquid, for example, because there is a limited trading market for them.

The Fund or an Underlying Fund may be unable to sell a restricted or illiquid security. In addition, it may be more difficult to determine a market value for restricted or illiquid securities. Moreover, if adverse market conditions were to develop during the period between the Fund's or an Underlying Fund's decision to sell a restricted or illiquid security and the point at which the Fund or an Underlying Fund is permitted or able to sell such security, the Fund or an Underlying Fund might obtain a price less favorable than the price that prevailed when it decided to sell.

Investment Company Securities. The Fund and the Underlying Funds may invest in the securities of other investment companies, including CEFs, open-end funds, ETFs, unit investment trusts and BDCs registered under the 1940 Act (collectively, the "Investment Companies"), to the extent permitted under applicable law and subject to certain restrictions.

Under Section 12(d)(1)(A) of the 1940 Act, the Fund may hold securities of an Investment Company in amounts which (i) do not exceed 3% of the total outstanding voting stock of the Investment Company, (ii) do not exceed 5% of the value of the Fund's total assets and (iii) when added to all other Investment Company securities held by the Fund, do not exceed 10% of the value of the Fund's total assets. These limits may be exceeded when permitted under Rule 12d1-4. The Fund intends to rely on Section 12(d)(1)(F) of the 1940 Act, which provides that the provisions of paragraph 12(d)(1)(A) shall not apply to securities purchased or otherwise acquired by the Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such Investment Company is owned by the Fund and all affiliated persons of the Fund, and (ii) certain requirements are met with respect to sales charges, or Rule 12d1-4.

In addition, to comply with provisions of the 1940 Act, in any matter upon which Investment Company stockholders are solicited to vote, the Adviser or Subadviser, as applicable, may be required to vote Investment Company shares in the same proportion as shares held by other stockholders of the Investment Company.

Acquired funds typically incur fees that are separate from those fees incurred directly by the Fund or an Underlying Fund. The Fund's or an Underlying Fund's purchase of Investment Company securities results in the layering of expenses as Common Shareholders would indirectly bear a proportionate share of the operating expenses of such Investment Companies, including advisory fees, in addition to paying Fund or Underlying Fund expenses. In addition, the securities of Investment Companies may also be leveraged and will therefore be subject to certain leverage risks. The NAV and market value of leveraged securities will be more volatile and the yield to Common Shareholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment Companies may also have investment policies that differ from those of the Fund or an Underlying Fund.

Under certain circumstances an open-end investment company in which the Fund or an Underlying Fund invests may determine to make a payment of a redemption by the Fund or an Underlying Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, the Fund or an Underlying Fund may hold such securities until the Adviser, Subadviser or manager of the Underlying Fund, as applicable, determines it is appropriate to dispose of them. Such disposition will impose additional costs on the Fund or an Underlying Fund.

Investment decisions by the investment advisers to the registered investment companies in which the Fund invests are made independently of the Fund. At any particular time, an Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result, under these circumstances the Fund indirectly would incur certain transactional costs without accomplishing any investment purpose. See also "—Exchange Traded Funds."

Investment Grade Debt Securities. Investment grade securities are those rated "Baa" or higher by Moody's or "BBB" or higher by S&P or rated similarly by another NRSRO or, if unrated, judged to be of equivalent quality as determined by the Adviser or Subadviser, as applicable. Moody's considers bonds it rates "Baa" to have speculative elements as well as investment-grade characteristics. To the extent that the Fund invests in higher-grade securities, the Fund will not be able to avail itself of opportunities for higher income which may be available at lower grades.

Inverse Floating Rate Securities. Inverse floating rate securities (sometimes referred to as "inverse floaters") are securities whose interest rates bear an inverse relationship to the interest rate on another security or the value of an index. Generally, inverse floating rate securities represent beneficial interests in a special purpose trust formed for the purpose of holding municipal bonds. The special purpose trust typically sells two classes of beneficial interests or securities: floating rate securities (sometimes referred to as short-term floaters or tender option bonds) and inverse floating rate securities (sometimes referred to as inverse floaters). Both classes of beneficial interests are represented by certificates. The short-term floating rate securities have first priority on the cash flow from the municipal bonds held by the special purpose trust. Typically, a third party, such as a bank, broker-dealer or other financial institution, grants the floating rate security holders the option, at periodic intervals, to tender their securities to the institution and receive the face value thereof. As consideration for providing the option, the financial institution receives periodic fees. The holder of the short-term floater effectively holds a demand obligation that bears interest at the prevailing short-term, tax-exempt rate. However, the institution granting the tender option will not be obligated to accept tendered short-term floaters in the event of certain defaults or a significant downgrade in the credit rating assigned to the bond issuer. For its inverse floating rate investment, the Fund receives the residual cash flow from the special purpose trust. Because the holder of the short-term floater is generally assured liquidity at the face value of the security, the Fund as the holder of the inverse floater assumes the interest rate cash flow risk and the market value risk associated with the municipal security deposited into the special purpose trust. The volatility of the interest cash flow and the residual market value will vary with the degree to which the trust is leveraged. This is expressed in the ratio of the total face value of the short-term floaters in relation to the value of the residual inverse floaters that are issued by the special purpose trust. In addition, all voting rights and decisions to be made with respect to any other rights relating to the municipal bonds held in the special purpose trust are passed through to the Fund, as the holder of the residual inverse floating rate securities.

Because increases in the interest rate on the short-term floaters reduce the residual interest paid on inverse floaters, and because fluctuations in the value of the municipal bond deposited in the special purpose trust affect the value of the inverse floater only, and not the value of the short-term floater issued by the trust, inverse floaters' value is generally more volatile than that of fixed rate bonds. The market price of inverse floating rate securities is generally more volatile than the underlying securities due to the leveraging effect of this ownership structure. These securities generally will underperform the market of fixed rate bonds in a rising interest rate environment (i.e., when bond values are falling), but tend to outperform the market of fixed rate bonds when interest rates decline or remain relatively stable. Although volatile, inverse floaters typically offer the potential for yields exceeding the yields available on fixed rate bonds with comparable credit quality, coupon, call provisions and maturity. Inverse floaters have varying degrees of liquidity based upon, among other things, the liquidity of the underlying securities deposited in a special purpose trust.

The Fund may invest in TOB Residuals that have recourse to the Fund. In the Adviser's or Subadviser's discretion, the Fund may enter into a separate shortfall and forbearance agreement with the third party granting liquidity to the floating rate security holders of the special purpose trust. The Fund may enter into such recourse agreements (i) when the liquidity provider to the special purpose trust requires such an agreement because the level of leverage in the special purpose trust exceeds the level that the liquidity provider is willing to support absent such an agreement; and/or (ii) to seek to prevent the liquidity provider from collapsing the special purpose trust in the event that the municipal obligation held in the trust has declined in value. Such an agreement would require the Fund to reimburse the third party granting liquidity to the floating rate security holders of the special purpose trust, upon termination of the trust issuing the inverse floater, the difference between the liquidation value of the bonds held in the trust and the principal amount due to the holders of floating rate interests. In such instances, the Fund may be at risk of loss that exceeds its investment in the inverse floating rate securities. Absent a shortfall and forbearance agreement, the Fund would not be required to make such a reimbursement. If the Fund chooses not to enter into such an agreement, the special purpose trust could be liquidated and the Fund could incur a loss.

The Fund may invest in both inverse floating rate securities and floating rate securities (as discussed below) issued by the same special purpose trust.

Investments in inverse floating rate securities have the economic effect of leverage. The use of leverage creates special risks for Common Shareholders. See the Prospectus under "Risks—Structural Risk—Leverage Risks."

Floating Rate Securities. The Fund may also invest in floating rate securities, as described above, issued by special purpose trusts. Floating rate securities may take the form of short-term floating rate securities or the option period may be substantially longer. Generally, the interest rate earned will be based upon the market rates for municipal securities with maturities or remarketing provisions that are comparable in duration to the periodic interval of the tender option, which may vary from weekly, to monthly, to extended periods of one year or multiple years. Since the option feature has a shorter term than the final maturity or first call date of the underlying bond deposited in the trust, the Fund as the holder of the floating rate security relies upon the terms of the agreement with the financial institution furnishing the option as well as the credit strength of that institution. As further assurance of liquidity, the terms of the trust provide for a liquidation of the municipal security deposited in the trust and the application of the proceeds to pay off the floating rate security. The trusts that are organized to issue both short-term floating rate securities and inverse floaters generally include liquidation triggers to protect the investor in the floating rate security.

Auction Rate Securities. Municipal securities also include auction rate municipal securities and auction rate preferred securities issued by closed-end investment companies that invest primarily in municipal securities (collectively, “auction rate securities”). In recent market environments, auctions have failed, which adversely affects the liquidity and price of auction rate securities, and are unlikely to resume. Provided that the auction mechanism is successful, auction rate securities usually permit the holder to sell the securities in an auction at par value at specified intervals. The dividend is reset by “Dutch” auction in which bids are made by broker-dealers and other institutions for a certain amount of securities at a specified minimum yield. The dividend rate set by the auction is the lowest interest or dividend rate that covers all securities offered for sale. While this process is designed to permit auction rate securities to be traded at par value, there is a risk that an auction will fail due to insufficient demand for the securities. Moreover, between auctions, there may be no secondary market for these securities, and sales conducted on a secondary market may not be on terms favorable to the seller. Auction rate securities may be called by the issuer. Thus, with respect to liquidity and price stability, auction rate securities may differ substantially from cash equivalents, notwithstanding the frequency of auctions and the credit quality of the security. The Fund’s investments in auction rate securities of CEFs are subject to the limitations prescribed by the 1940 Act. The Fund will indirectly bear its proportionate share of any management and other fees paid by such CEFs in addition to the advisory fees payable directly by the Fund.

Taxable Municipal Securities. The Fund and the Underlying Funds may invest in taxable municipal securities, which include obligations issued pursuant to the legislation providing for the issuance of taxable municipal debt on which the issuer receives federal support. The Fund’s investments in taxable municipal bonds will result in taxable income, and the Fund may elect to pass through to Common Shareholders the corresponding tax credits. The tax credits can generally be used to offset federal income taxes and the alternative minimum tax, but such credits are generally not refundable. Taxable municipal bonds involve similar risks as tax-exempt municipal bonds. See “Risks—Investment-Related Risks—Municipal Bond Risks” in the Prospectus and “—Municipal Securities” in this SAI.

Temporary Investments and Defensive Position. During the period where the net proceeds of an offering of Securities are being invested or during periods in which the Adviser or Subadviser determines that it is temporarily unable to follow the Fund’s investment strategy or that it is impractical to do so, the Fund may deviate from its investment strategy and invest all or any portion of its net assets in cash, cash equivalents or other securities. The Adviser’s or Subadviser’s determination that it is temporarily unable to follow the Fund’s investment strategy or that it is impracticable to do so generally will occur only in situations in which a market disruption event has occurred and where trading in the securities selected through application of the Fund’s investment strategy is extremely limited or absent. In such a case, the Fund may not pursue or achieve its investment objectives.

Cash and cash equivalents are defined to include, without limitation, the following:

(1) U.S. Government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. Government agencies or instrumentalities. U.S. Government agency securities include securities issued by: (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association; and (d) the Student Loan Marketing Association. While the U.S. Government typically provides financial support to such U.S. Government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. Government, its agencies, and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate.

(2) Certificates of deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current Federal Deposit Insurance Corporation ("FDIC") regulations, the maximum insurance payable as to any one certificate of deposit is \$250,000, therefore, certificates of deposit purchased by the Fund may not be fully insured.

(3) Repurchase agreements, which involve purchases of debt securities. At the time the Fund purchases securities pursuant to a repurchase agreement, it simultaneously agrees to resell and redeliver such securities to the seller, who also simultaneously agrees to buy back the securities at a fixed price and time. This assures a predetermined yield for the Fund during its holding period, since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest temporarily available cash. Pursuant to the Fund's policies and procedures, the Fund may enter into repurchase agreements only with respect to obligations of the U.S. Government, its agencies or instrumentalities; certificates of deposit; or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The Adviser or Subadviser, as applicable, monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The Adviser or Subadviser does so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. The Adviser or Subadviser, as applicable, will consider the financial condition of the corporation (*e.g.*, earning power, cash flow, and other liquidity measures) and will continuously monitor the corporation's ability to meet all its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. Investments in commercial paper will be limited to commercial paper rated in the highest categories by a NRSRO and which mature within one year of the date of purchase or carry a variable or floating rate of interest.

(5) The Fund may invest in bankers' acceptances which are short-term credit instruments used to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an asset or it may be sold in the secondary market at the going rate of interest for a specific maturity.

(6) The Fund may invest in bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest. There may be penalties for the early withdrawal of such time deposits, in which case the yields of these investments will be reduced.

(7) The Fund may invest in shares of money market funds in accordance with the provisions of the 1940 Act.

Zero Coupon Bonds. A zero coupon bond is a bond that typically does not pay interest either for the entire life of the obligation or for an initial period after the issuance of the obligation. When held to its maturity, the holder receives the par value of the zero coupon bond, which generates a return equal to the difference between the purchase price and its maturity value. A zero coupon bond is normally issued and traded at a deep discount from face value. This original issue discount ("OID") approximates the total amount of interest the security will accrue and compound prior to its maturity and reflects the payment deferral and credit risk associated with the instrument. Because zero coupon securities and other OID instruments do not pay cash interest at regular intervals, the instruments' ongoing accruals require ongoing judgments concerning the collectability of deferred payments and the value of any associated collateral. As a result, these securities may be subject to greater value fluctuations and less liquidity in the event of adverse market conditions than comparably rated securities that pay cash on a current basis. Because zero coupon bonds, and OID instruments generally, allow an issuer to avoid or delay the need to generate cash to meet current interest payments, they may involve greater payment deferral and credit risk than coupon loans and bonds that pay interest currently or in cash. The Fund generally will be required to distribute dividends to Common Shareholders representing the income of these instruments as it accrues, even though the Fund will not receive all of the income on a current basis or in cash. Thus, the Fund may have to sell other investments, including when it may not be advisable to do so, and use the cash proceeds to make income distributions to Common Shareholders. For accounting purposes, these cash distributions to Common Shareholders will not be treated as a return of capital.

Further, the Adviser collects management fees on the value of a zero coupon bond or OID instrument attributable to the ongoing non-cash accrual of interest over the life of the bond or other instrument. As a result, the Adviser receives non-refundable cash payments based on such non-cash accruals while investors incur the risk that such non-cash accruals ultimately may not be realized.

Additional Risks of Investing in the Fund

Below Investment Grade Securities Risk. The Fund or the Underlying Funds may invest in below investment grade securities, which are commonly referred to as "junk" or "high yield" securities. These securities are considered to be high-risk investments. The risks include the following:

These securities are regarded as predominately speculative. There is a greater risk that issuers of lower-rated securities will default than issuers of higher-rated securities. Issuers of lower-rated securities generally are less creditworthy and may be highly indebted, financially distressed or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, below investment grade securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, the Fund would experience a decrease in income and a decline in the market value of its investments. The Fund or the Underlying Funds also may incur additional expenses in seeking recovery from the issuer.

The income and market value of lower-rated securities may fluctuate more than higher-rated securities. Although certain below investment grade securities may be less sensitive to interest rate changes than investment grade securities, below investment grade securities generally are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn.

It is often more difficult to value lower-rated securities than higher-rated securities. If an issuer's financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower-rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower-rated securities, valuation of such investments is much more dependent on judgment than is the case with higher-rated securities.

There may be no established secondary or public market for investments in lower-rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher-rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, lower-rated securities may be required to be sold at substantial losses or retained indefinitely even where an issuer's financial condition is deteriorating.

Credit quality of below investment grade securities can change suddenly and unexpectedly, and even recently-issued credit ratings may not fully reflect the actual risks posed by a particular below investment grade security.

Future legislation may have a possible negative impact on the market for below investment grade securities. Because of the substantial risks associated with below investment grade securities, you could lose money on your investment in Common Shares, both in the short term and the long term.

Call Risk. If interest rates fall, it is possible that issuers of securities with high interest rates will prepay or "call" their securities before their maturity dates. In this event, the proceeds from the called securities would likely be reinvested by the Fund in securities bearing the new, lower interest rates, resulting in a possible decline in the Fund's income and distributions to Common Shareholders.

Deflation Risk. Deflation risk is the risk that prices throughout the economy decline over time, which may have an adverse effect on the market valuation of companies, their assets and revenues. In addition, deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline.

Interest Rate Risk. Interest rate risk is the risk that the value of the debt securities held by the Fund will decline because of rising market interest rates. Interest rate risk is generally lower for shorter-term investments and higher for longer-term investments. Duration is a common measure of interest rate risk, which measures a bond's expected life on a present value basis, taking into account the bond's yield, interest payments and final maturity. Duration is a reasonably accurate measure of a bond's price sensitivity to changes in interest rates. The longer the duration of a bond, the greater the bond's price sensitivity is to changes in interest rates.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Common Shares' market price or their overall returns.

Legislation and Regulatory Risks. The Fund and the Underlying Funds are subject to legislation and regulatory risks. On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was enacted. The Dodd-Frank Act, among other things, grants regulatory authorities such as the U.S. Commodity Futures Trading Commission (the "CFTC") and the SEC broad rulemaking authority to promulgate rules under the Dodd-Frank Act, including comprehensive regulation of the over-the-counter derivatives market. It is unclear to what extent these regulators will exercise these revised and expanded powers and whether they will undertake rulemaking, supervisory or enforcement actions that would adversely affect the Fund or Underlying Funds or investments made by the Fund or Underlying Funds. Possible regulatory actions taken under these revised and expanded powers may include actions related to financial consumer protection, proprietary trading and derivatives.

While some rules have been promulgated by the CFTC and the SEC, a number of important rulemakings have not yet been finalized and there can be no assurance that future regulatory actions authorized by the Dodd-Frank Act will not significantly reduce the returns of the Fund. The implementation of the Dodd-Frank Act could adversely affect the Fund by increasing transaction and/or regulatory compliance costs and may affect the availability, liquidity and cost of entering into derivatives, including potentially limiting or restricting the ability of the Fund to use certain derivatives or certain counterparties as a part of its investment strategy, increasing the costs of using these instruments or making these instruments less effective. In addition, greater regulatory scrutiny may increase the Fund's, the Adviser's or Subadviser's exposure to potential liabilities. Increased regulatory oversight can also impose administrative burdens on the Fund, the Adviser and Subadviser, including, without limitation, responding to examinations or investigations and implementing new policies and procedures.

At any time after the date of this SAI, legislation by U.S. and foreign governments may be enacted that could negatively affect the assets of the Fund or the issuers of such assets. Changing approaches to regulation may have a negative impact on the entities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or Underlying Funds or will not impair the ability of the Fund or Underlying Funds to achieve its investment objective.

MANAGEMENT OF THE FUND

Investment Adviser

RiverNorth Capital Management, LLC ("RiverNorth" or the "Adviser") is the investment adviser for the Fund pursuant to an Investment Advisory Agreement. RiverNorth is headquartered at 360 South Rosemary Avenue, Suite 1420, West Palm Beach, FL 33401. Under the oversight of the Board of Directors, the Adviser is responsible for the day-to-day management of the Fund's portfolio, managing the Fund's business affairs and providing certain clerical, bookkeeping and other administrative services. The Adviser is also responsible for determining the Fund's overall investment strategy and overseeing its implementation. Subject to the ranges noted above, the Adviser determines the portion of the Fund's Managed Assets to allocate to each strategy and may, from time to time, adjust the allocations. Founded in 2000, RiverNorth is registered with the SEC and as of May 31, 2023, managed approximately \$5.0 billion for registered open-end management investment companies, registered closed-end management investment companies and private investment vehicles. Patrick W. Galley, a portfolio manager of the Fund, and Brian H. Schmucker, each own, directly or indirectly, more than 25% of RiverNorth Holding Co., the indirect parent company of the Adviser and each is deemed to control the Adviser.

Investment Subadviser

MacKay Shields LLC (“MacKay” or the “Subadviser”) is the Fund’s subadviser and is responsible for the day-to-day management of the Fund’s Managed Assets allocated to the Municipal Bond Income Strategy. The Subadviser is registered with the SEC and as of May 31, 2023, had approximately \$132.5 billion in assets under management. The Subadviser was incorporated in 1969 as an independent investment advisory firm and was privately held until 1984 when it was acquired by New York Life Insurance Company. The Subadviser is an indirect wholly owned subsidiary of New York Life Insurance Company.

Investment Advisory Agreement and Subadvisory Agreement

For its services under the Investment Advisory Agreement, the Fund pays the Adviser a monthly management fee computed at the annual rate of 1.40% of the average daily Managed Assets. Pursuant to a Subadvisory Agreement, the Adviser has delegated daily management of the Fund’s Municipal Bond Income Strategy to the Subadviser, who is paid by the Adviser and not the Fund. The Adviser (and not the Fund) has agreed to pay the Subadviser a subadvisory fee payable on a monthly basis at the annual rate of 0.20% of the Fund’s average daily Managed Assets for the service it provides. “Managed Assets” means the total assets of the Fund, including assets attributable to leverage, minus liabilities (other than debt representing leverage and any preferred stock that may be outstanding). The Fund pays, in addition to the unified management fee, taxes and governmental fees, if any, levied against the Fund; brokerage fees and commissions and other portfolio transaction expenses incurred by or for the Fund; costs, including interest expenses, of borrowing money or engaging in other types of leverage financing including, without limit, through the use by the Fund of tender option bond transactions; costs, including dividend and/or interest expenses and other costs (including, without limit, offering and related legal costs, fees to brokers, fees to auction agents, fees to transfer agents, fees to ratings agencies and fees to auditors associated with satisfying ratings agency requirements for preferred shares or other securities issued by the Fund and other related requirements in the Fund’s organizational documents) associated with the Fund’s issuance, offering, redemption and maintenance of preferred shares or other instruments (such as the use of tender option bond transactions) for the purpose of incurring leverage; fees and expenses of any Underlying Funds in which the Fund invests; dividend and interest expenses on short positions taken by the Fund; fees and expenses, including travel expenses and fees and expenses of legal counsel retained for their benefit, of directors of the Fund who are not officers, employees, partners, shareholders or members of the Adviser or its affiliates; fees and expenses associated with and incident to shareholder meetings and proxy solicitations involving contested elections of directors, shareholder proposals or other non-routine matters that are not initiated or proposed by the Adviser; legal, marketing, printing, accounting and other expenses associated with any future share offerings, such as rights offerings and shelf offerings, following the Fund’s initial offering; expenses associated with tender offers (other than any Eligible Tender Offer) and other share repurchases and redemptions; and other extraordinary expenses, including extraordinary legal expenses, as may arise, including, without limit, expenses incurred in connection with litigation, proceedings, other claims and the legal obligations of the Fund to indemnify its directors, officers, employees, shareholders, distributors and agents with respect thereto.

If the Fund determines to use leverage, the fees paid to the Adviser and Subadviser for investment management services will be higher than if the Fund did not use leverage because the fees paid will be calculated based on Managed Assets, which would include assets attributable to leverage. Because the fees paid to the Adviser and Subadviser are determined on the basis of Managed Assets, this creates a conflict of interest for the Adviser and Subadviser. The Board of Directors monitors the Fund's use of leverage and in doing so monitors this potential conflict.

The Investment Advisory Agreement provides that the Adviser shall not be liable for any act or omission connected with or arising out of any services to be rendered under such agreement, except by reason of willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties or from reckless disregard by the Adviser of its obligations and duties under such agreement.

The Adviser will make available, without additional expense to the Fund, the services of such of its officers, directors and employees as may be duly elected as officers or directors of the Fund, subject to the individual consent of such persons to serve and to any limitations imposed by law. The Adviser pays all expenses incurred in performing its services under the Investment Advisory Agreement, including compensation of and office space for directors, officers and employees of the Adviser connected with management of the Fund. The Fund pays brokerage and other expenses of executing the Fund's portfolio transactions; taxes or governmental fees; interest charges and other costs of borrowing funds; litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The Investment Advisory Agreement and the Subadvisory Agreement were in effect for an initial term ending two years from the effective date of the respective agreement. The Investment Advisory Agreement continues in effect from year to year thereafter if approved annually (i) by a majority of the outstanding voting securities of the Fund or by a vote of the Fund's Board of Directors, cast in person at a meeting called for the purpose of voting on such approval, and (ii) by vote of a majority of the Board of Directors who are not parties to the Investment Advisory Agreement, or "interested persons" of any party to the Investment Advisory Agreement, cast in person at a meeting called for the purpose of voting on such approval. The Subadvisory Agreement continues in effect from year to year after its initial two year term if approved annually by the Fund's Board of Directors or a vote of the lesser of (x) 67% of the shares of the Fund represented at a meeting if Common Shareholders of more than 50% of the outstanding shares of the Fund are present in person or by proxy or (y) more than 50% of the outstanding shares of the Fund; provided that in either event its continuance is also approved by a majority of the Fund's directors who are not "interested persons" of any party to the Subadvisory Agreement, by vote cast in person at a meeting called for the purpose of voting on such approval. Information regarding the Board of Directors' approval of the Investment Advisory Agreement and the Subadvisory Agreement is available in the Fund's semi-annual report to Common Shareholders for the period ended December 31, 2022. The Investment Advisory Agreement and the Subadvisory Agreement will terminate upon assignment by any party and is terminable, without penalty, on 60 days' written notice by the Board of Directors or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund or upon 60 days' written notice by the Adviser or, as applicable, the Subadviser.

The total dollar amount paid by the Fund to the Adviser for the fiscal years ended June 30, 2023 and June 30, 2022, and the fiscal period from February 24, 2021 (commencement of operations) through June 30, 2021 were \$8,682,182, \$9,438,045 and \$3,011,437, respectively. The total dollar amount paid by the Adviser to the Subadviser for the fiscal years ended June 30, 2023 and June 30, 2022 and the fiscal period from February 24, 2021 (commencement of operations) through June 30, 2021 were \$1,240,338, \$1,348,352 and \$430,205, respectively. The Adviser (and not the Fund) pays all sub-advisory fees to the Sub-Adviser. See "Summary of Fund Expenses" in the Prospectus.

Portfolio Managers

Patrick W. Galley, CFA has been a co-portfolio manager of the Tactical Municipal Closed-End Fund Strategy for the Fund since its inception. Mr. Galley is the Chief Executive Officer and Chief Investment Officer for the Adviser. Mr. Galley heads the Adviser's research and investment team and oversees all portfolio management activities at the Adviser. Mr. Galley also serves as the President and Chairman of the RiverNorth Funds, a mutual fund complex for which RiverNorth serves as the investment adviser. Prior to joining the Adviser in 2004, he was most recently a Vice President at Bank of America in the Global Investment Bank's Portfolio Management group, where he specialized in analyzing and structuring corporate transactions for investment management firms in addition to closed-end and open-end funds, hedge funds, funds of funds, structured investment vehicles and insurance/reinsurance companies. Mr. Galley graduated with honors from Rochester Institute of Technology with a B.S. in Finance. He has received the Chartered Financial Analyst (CFA) designation, is a member of the CFA Institute and is a member of the CFA Society of Chicago.

Stephen O'Neill, CFA has been a co-portfolio manager of the Tactical Municipal Closed-End Fund Strategy for the Fund since its inception. Mr. O'Neill conducts qualitative and quantitative analysis of CEFs and their respective asset classes at RiverNorth. Prior to joining RiverNorth in 2007, Mr. O'Neill was most recently an Assistant Vice President at Bank of America in the Global Investment Bank's Portfolio Management group. At Bank of America, he specialized in the corporate real estate, asset management, and structured finance industries. Mr. O'Neill graduated magna cum laude from Miami University in Oxford, Ohio with a B.S. in Finance. Mr. O'Neill has received the Chartered Financial Analyst (CFA) designation, is a member of the CFA Institute, and is a member of the CFA Society of Chicago.

Robert DiMella, CFA has been a co-portfolio manager of the Municipal Bond Income Strategy for the Fund since its inception. Mr. DiMella is an Executive Managing Director of the Subadviser. He has managed the MainStay Tax Free Bond Fund since 2009, the MainStay High Yield Municipal Bond Fund since 2010, the MainStay New York Tax Free Opportunities Fund since May 2012, the MainStay Defined Term Municipal Opportunities Fund since 2012, the MainStay California Tax Free Opportunities Fund since 2013 and the MainStay Tax Advantaged Short Term Bond Fund since June 2015. Previously, he co-founded Mariner Municipal Managers LLC (2007 to 2009). Prior to BlackRock's merger with Merrill Lynch Investment Managers ("MLIM"), he served as a Senior Portfolio Manager and Managing Director of the Municipal Products Group. Mr. DiMella earned his Master's degree at Rutgers University Business School and a Bachelors Degree at the University of Connecticut, and he has received the CFA designation.

John Loffredo, CFA has been a co-portfolio manager of the Municipal Bond Income Strategy for the Fund since its inception. Mr. Loffredo is an Executive Managing Director of the Subadviser. Mr. Loffredo has managed the MainStay Tax Free Bond Fund since 2009, the MainStay High Yield Municipal Bond Fund since 2010, the MainStay New York Tax Free Opportunities Fund since 2012, the MainStay Defined Term Municipal Opportunities Fund since 2012, the MainStay California Tax Free Opportunities Fund since 2013 and the MainStay Tax Advantaged Short Term Bond Fund since June 2015. He has been a municipal portfolio manager and/or municipal analyst on Wall Street since 1990, with a broad range of portfolio management and analytic experience in the municipal markets. He previously co-founded Mariner Municipal Managers LLC (2007 to 2009). Prior to BlackRock's merger with MLIM, he served as Chief Investment Officer of the Municipal Products Group of MLIM. Mr. Loffredo graduated cum laude with an MBA from Utah State University where he was a Harry S. Truman Scholar. He also has a Certificate of Public Management from Boston University, and he has received the CFA designation.

Michael Petty has been a co-portfolio manager of the Municipal Bond Income Strategy for the Fund since its inception. Mr. Petty is a Senior Managing Director of the Subadviser. Mr. Petty has managed the MainStay High Yield Municipal Bond Fund since 2010, the MainStay Tax Free Bond Fund since 2011, the MainStay New York Tax Free Opportunities Fund since 2012, the MainStay Defined Term Municipal Opportunities Fund since 2012, the MainStay California Tax Free Opportunities Fund since 2013 and the MainStay Tax Advantaged Short Term Bond Fund since June 2015. Before joining the Subadviser in 2009, he was a Portfolio Manager for Mariner Municipal Managers. He has been a portfolio manager on Wall Street since 1992, and has worked in the municipal products market since 1985. Mr. Petty has a broad array of trading, portfolio management, and sales experience. Prior to joining Mariner Municipal Managers, he was a Senior Portfolio Manager at Dreyfus Corporation from 1997 to 2009. From 1992 to 1997, he served as a Portfolio Manager for Merrill Lynch Investment Managers. Mr. Petty graduated from Hobart College with a B.S. in Mathematics and Economics.

Scott Sprauer has been a co-portfolio manager of the Municipal Bond Income Strategy for the Fund since its inception. Mr. Sprauer is a Senior Managing Director of the Subadviser. He joined the Subadviser in 2009 as a Portfolio Manager in the Municipal Bond Division. He has managed the MainStay New York Tax Free Opportunities Fund since 2012, the MainStay Defined Term Municipal Opportunities Fund since 2012, the MainStay California Tax Free Opportunities Fund since 2013, the MainStay High Yield Municipal Bond Fund and MainStay Tax Free Bond Fund since February 2014 and the MainStay Tax Advantaged Short Term Bond Fund since June 2015. Prior to joining the Subadviser, he was the Head Trader, Fixed Income at Financial Guaranty Insurance Company from 2006 to 2009. He has a BSBA from Villanova University, and has been in the investment management industry since 1991.

David Dowden has been a co-portfolio manager of the Municipal Bond Income Strategy for the Fund since its inception. Mr. Dowden is a Managing Director of the Subadviser. He joined the Subadviser in 2009 as a Portfolio Manager in the Municipal Bond Division. He has managed the MainStay New York Tax Free Opportunities Fund since 2012, the MainStay Defined Term Municipal Opportunities Fund since 2012, the MainStay California Tax Free Opportunities Fund since 2013, the MainStay High Yield Municipal Bond Fund and MainStay Tax Free Bond Fund since February 2014 and the MainStay Tax Advantaged Short Term Bond Fund since June 2015. Prior to joining the Subadviser, he was the Chief Investment Officer at Financial Guaranty Insurance Company from 2006 to 2009. He has a BA from Brown University and an MBA from Columbia University. He has been in the investment management industry since 1989.

Robert Burke has been a co-portfolio manager of the Municipal Bond Income Strategy for the Fund since its inception. Mr. Burke is a Managing Director of the Subadviser. He joined the Subadviser in July 2017. Before joining the Subadviser, Mr. Burke held various leadership roles in capital markets, spending the majority of his time in the municipal markets. In his last role working for Bank of America Merrill Lynch, Mr. Burke managed the Global Futures, Derivatives Clearing and Foreign Exchange Prime Brokerage businesses. Mr. Burke started his career at Bank of America Merrill Lynch in the municipal bond department covering insurance, hedge fund, and asset management clients. He holds a Masters of Business Administration from the Gabelli School at Fordham University, and a Bachelor of Arts with High Honors in Economics from Colgate University. Mr. Burke has received the CFA designation. He has been in the investment management industry since 1985.

John Lawlor has been a co-portfolio manager of the Municipal Bond Income Strategy for the Fund since its inception. He is a Managing Director of the Subadviser. Mr. Lawlor joined MacKay Shields in 2016. Before joining the firm, he was Vice President Equity Sales at Deutsche Bank and was previously at Bank of America Merrill Lynch. From 1997-2011, he was a senior trader on the floor of the New York Stock Exchange. Mr. Lawlor has a broad and diverse set of skills in sales, trading, and electronic trading platforms. He earned a Bachelor's degree in Finance from Lehigh University. Mr. Lawlor graduated college in 1997. He has been in the financial services industry since 1997.

Compensation of Portfolio Managers

RiverNorth Capital Management, LLC

Mr. Galley's and Mr. O'Neill's total compensation package, like others in the Adviser's business, is a package designed to attract and retain investment professionals. The compensation package includes a base salary fixed from year to year. The amount of the base salary is assessed for its competitiveness in the industry and geographic location of the Adviser. The compensation package also provides for an annual but variable performance bonus. The performance bonus reflects individual performance of the portfolio manager in his or her allocated duties and responsibilities. While performance of the funds managed by the portfolio managers is considered in determining the annual performance bonus, it is but one factor. The overall success of the Adviser in its business objectives and the performance of the Adviser's business as a whole are more important factors than the investment performance of a particular fund or account. Mr. Galley and Mr. O'Neill also participate in a 401K program on the same basis as other officers of the Adviser, which includes matching of employee contributions up to a certain percent of the portfolio managers base salary. Those portfolio managers that are also equity stakeholders in the Adviser or its affiliates may also receive periodic distribution of profits from business operations.

MacKay Shields LLC

The Subadviser establishes salaries at competitive levels, verified through industry surveys, to attract and maintain the best professional talent. Incentives are paid annually to the firm's employees based upon an individual's performance and the profitability of the firm, and in some instances may be fixed and guaranteed for a period of time. Incentive bonuses (both cash and deferred) are an integral portion of total compensation at MacKay Shields and vary based upon an individual's role, responsibility and performance. A significant percentage of the compensation program for the Fund's portfolio managers is incentive based.

The Subadviser has a phantom equity program and awards are an integral component of the firm's compensation structure. Awards vest and pay out after several years. Thus, eligible professionals share in the results and success of the firm.

The compensation received by portfolio managers is generally based on both quantitative and qualitative factors. The quantitative factors may include: (i) investment performance; (ii) assets under management; (iii) revenues and profitability; and (iv) industry benchmarks. The qualitative factors may include, among others, leadership, adherence to the firm's policies and procedures, and contribution to the firm's goals and objectives.

To the extent that an increase in the size of the Fund or another account managed by a portfolio manager has a positive impact on revenues/profitability, a portfolio manager's compensation may also increase. There is no difference between the method used in determining portfolio managers' compensation with respect to the Fund and other accounts they manage. The Subadviser does not believe the compensation structure provides an incentive for an employee who provides services to the Fund to take undue risks in managing the assets of the Fund.

Portfolio Manager Ownership of Fund Shares

The following table sets forth the dollar range of equity securities in the Fund beneficially owned, as of June 30, 2023, by each of the portfolio managers identified above.

Name of the Portfolio Manager	Dollar Range of Equity Securities of the Fund¹
Patrick W. Galley	\$100,001-\$500,000
Stephen A. O'Neill	\$100,001-\$500,000
Robert DiMella	\$100,001-\$500,000
John Loffredo	\$0
Michael Petty	\$0
Scott Sprauer	\$50,001 - \$100,000
David Dowden	\$0
Robert Burke	\$0
John Lawlor	\$0

(1) “Beneficial Ownership” is determined in accordance with section 16a-1(a)(2) of the Securities Exchange Act of 1934, as amended.

Conflicts of Interest

Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other accounts. More specifically, portfolio managers who manage multiple funds are presented with the following potential conflicts, among others:

The management of multiple accounts may result in a portfolio manager devoting unequal time and attention to the management of each account. The management of multiple funds and accounts also may give rise to potential conflicts of interest if the funds and accounts have different objectives, benchmarks, time horizons and fees as the portfolio manager must allocate his time and investment ideas across multiple funds and accounts. Another potential conflict of interest may arise where another account has the same or similar investment objective as the Fund, whereby the portfolio manager could favor one account over another.

With respect to securities transactions for the Fund, the Adviser or Subadviser determines which broker to use to execute each order, consistent with the duty to seek best execution of the transaction. A portfolio manager may execute transactions for another fund or account that may adversely impact the value of securities held by the Fund. Securities selected for funds or accounts other than the Fund may outperform the securities selected for the Fund. Further, a potential conflict could include a portfolio manager’s knowledge about the size, timing and possible market impact of Fund trades, whereby they could use this information to the advantage of other accounts and to the disadvantage of the Fund. These potential conflicts of interest could create the appearance that a portfolio manager is favoring one investment vehicle over another.

The management of personal accounts also may give rise to potential conflicts of interest. Although a portfolio manager generally does not trade securities in his or her own personal account, the Adviser, the Subadviser and the Fund have each adopted a code of ethics that, among other things, permits personal trading by employees (including trading in securities that can be purchased, sold or held by the Fund) under conditions where it has been determined that such trades would not adversely impact client accounts. Nevertheless, the management of personal accounts may give rise to potential conflicts of interest, and there is no assurance that these codes of ethics will adequately address such conflicts.

Conflicts potentially limiting the Fund’s investment opportunities may also arise when the Fund and other clients of the Adviser or Subadviser invest in, or even conduct research relating to, different parts of an issuer’s capital structure, such as when the Fund owns senior debt obligations of an issuer and other clients own junior tranches of the same issuer. In such circumstances, decisions over whether to trigger an event of default, over the terms of any workout, or how to exit an investment may result in conflicts of interest. In order to minimize such conflicts, a portfolio manager may avoid certain investment opportunities that would potentially give rise to conflicts with other clients of the Adviser or Subadviser or result in the Adviser or Subadviser receiving material, non-public information, or the Adviser or Subadviser may enact internal procedures designed to minimize such conflicts, which could have the effect of limiting the Fund’s investment opportunities. Additionally, if the Adviser or Subadviser acquires material non-public confidential information in connection with its business activities for other clients, a portfolio manager or other investment personnel may be restricted from purchasing securities or selling certain securities for the Fund or other clients. When making investment decisions where a conflict of interest may arise, the Adviser and Subadviser will endeavor to act in a fair and equitable manner between the Fund and other clients; however, in certain instances the resolution of the conflict may result in the Adviser or Subadviser acting on behalf of another client in a manner that may not be in the best interest, or may be opposed to the best interest, of the Fund.

The Adviser and Subadviser have adopted certain compliance procedures which are designed to address these types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

The Underlying Funds in which the Fund invests will not include those that are advised or subadvised by the Adviser, the Subadviser or their affiliates.

Other Accounts Managed

As of June 30, 2023, the portfolio managers of the Fund were responsible for the management of the following other accounts (in addition to the Fund):

NUMBER OF OTHER ACCOUNTS MANAGED AND ASSETS BY ACCOUNT TYPE AS OF JUNE 30, 2023						
PORTFOLIO MANAGER	REGISTERED INVESTMENT COMPANIES (OTHER THAN THE FUND)	REGISTERED INVESTMENT COMPANIES SUBJECT TO PERFORMANCE- BASED ADVISORY FEES	OTHER POOLED INVESTMENT VEHICLES	OTHER POOLED INVESTMENT VEHICLES SUBJECT TO PERFORMANCE- BASED ADVISORY FEES	OTHER ACCOUNTS	OTHER ACCOUNTS SUBJECT TO PERFORMANCE- BASED ADVISORY FEES
Patrick W. Galley	13 \$3.39B	0 \$0	4 \$951M	4 \$951M	10 \$91.2M	10 \$91.2M
Stephen O'Neill	11 \$3.38B	0 \$0	4 \$951M	4 \$951M	10 \$91.2M	10 \$91.2M
Robert DiMella	17 \$31,247,949,556	0 \$0	9 \$10,861,287,343	2 \$793,711,988	85 \$25,169,751,601	2 \$604,085,337

Administrator

Under the Administration, Bookkeeping and Pricing Services Agreement (the “Administration Agreement”), subject to the supervision of the Board of Directors, ALPS Fund Services, Inc. (“AFS” or the “Administrator”) is responsible for calculating NAVs, providing additional fund accounting and tax services, and providing fund administration and compliance-related services. AFS will bear all expenses in connection with the performance of its services under the Administration Agreement, except for certain out-of-pocket expenses described therein. AFS will not bear any expenses incurred by the Fund, including but not limited to, initial organization and offering expenses; litigation expenses; costs of preferred shares (if any); expenses of conducting repurchase offers for the purpose of repurchasing Fund shares; transfer agency and custodial expenses; taxes; interest; Fund directors’ fees; compensation and expenses of Fund officers who are not associated with AFS or its affiliates; brokerage fees and commissions; state and federal registration fees; advisory fees; insurance premiums; fidelity bond premiums; Fund legal and audit fees and expenses; costs of maintenance of Fund existence; printing and delivery of materials in connection with meetings of the Fund’s directors; printing and mailing shareholder reports, offering documents, and proxy materials; securities pricing and data services; and expenses in connection with electronic filings with the SEC.

AFS, an affiliate of the Fund’s transfer agent, is entitled to receive a monthly fee based on the Fund’s net assets plus certain out of pocket expenses. See “Summary of Fund Expenses” in the prospectus.

Codes of Ethics

The Fund, Adviser and Subadviser have each adopted a code of ethics under Rule 17j-1 under the 1940 Act. These codes permit personnel subject to the code to invest in securities, including securities that may be purchased or held by the Fund. The codes of ethics are available on the EDGAR Database on the SEC’s website (<http://www.sec.gov>), and copies of these codes may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.

FUND SERVICE PROVIDERS

Independent Registered Public Accounting Firm

Cohen & Company, Ltd., located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, serves as the independent registered public accounting firm for the Fund. Cohen & Company, Ltd. audits the financial statements of the Fund and provides other audit, tax and related services.

Legal Counsel

Faegre Drinker Biddle & Reath LLP serves as legal counsel to the Fund and legal counsel to the independent directors of the Fund. Faegre Drinker Biddle & Reath LLP may rely as to certain matters of Maryland law on the opinion of Shapiro Sher Guinot & Sandler, P.A.

Custodian and Transfer Agent

State Street Bank and Trust Company, located at State Street Financial Center, One Lincoln Street, Boston, MA 02111, serves as the Fund's custodian and maintains custody of the securities and cash of the Fund pursuant to a Custody Agreement. Under the Custody Agreement, the custodian holds the Fund's assets in compliance with the 1940 Act. For its services, the custodian receives a monthly fee based upon, among other things, the average value of the total assets of the Fund, plus certain charges for securities transactions.

DST Systems, Inc., located at 333 West 9th Street, 2nd Floor, Kansas City, Missouri 64105, and an affiliate of the Administrator, serves as the transfer agent and registrar for the Fund.

PORTFOLIO TRANSACTIONS

Subject to policies established by the Board of Directors of the Fund, the Adviser or Subadviser is responsible for the Fund's portfolio decisions and the placing of the Fund's portfolio transactions. In placing portfolio transactions, the Adviser or Subadviser seeks the best qualitative execution for the Fund, taking into account such factors as price (including the applicable brokerage commission or dealer spread), the execution capability, financial responsibility and responsiveness of the broker or dealer and the brokerage and research services provided by the broker or dealer. The Adviser or Subadviser generally seeks favorable prices and commission rates that are reasonable in relation to the benefits received under the circumstances under which that particular trade is placed.

The Adviser or Subadviser is specifically authorized to select brokers or dealers who also provide brokerage and research services to the Fund and/or the other accounts over which the Adviser or Subadviser exercises investment discretion, and to pay such brokers or dealers a commission in excess of the commission another broker or dealer would charge if the Adviser or Subadviser determines in good faith that the commission is reasonable in relation to the value of the brokerage and research services provided. The determination may be viewed in terms of a particular transaction or the Adviser's or Subadviser's overall responsibilities with respect to the Fund and to other accounts over which it exercises investment discretion. The Adviser or Subadviser may not give consideration to sales of Common Shares of the Fund as a factor in the selection of brokers and dealers to execute portfolio transactions. However, the Adviser or Subadviser may place portfolio transactions with brokers or dealers that promote or sell the Fund's Common Shares so long as such placements are made pursuant to policies approved by the Board of Directors that are designed to ensure that the selection is based on the quality of the broker's execution and not on its sales efforts.

Research services include supplemental research, securities and economic analyses, statistical services and information with respect to the availability of securities or purchasers or sellers of securities and analyses of reports concerning performance of accounts. Much, if not all, of this information is the usual and customary research provided to the Adviser and Subadviser irrespective of any trading activity effected with that broker. The research services and other information furnished by brokers through whom the Fund effects securities transactions may also be used by the Adviser or Subadviser in servicing other accounts. Similarly, research and information provided by brokers or dealers when serving other clients may be useful to the Adviser or Subadviser in connection with its services to the Fund. Although research services and other information are useful to the Fund and the Adviser or Subadviser, it is not possible to place a dollar value on the research and other information received. It is the opinion of the Board of Directors and the Adviser or Subadviser that the review and study of the research and other information will not increase or reduce the overall cost to the Adviser or Subadviser of performing its duties to the Fund under the Agreement.

Over-the-counter transactions will be placed either directly with principal market makers or with broker-dealers, if the same or a better price, including commissions and executions, is available. Fixed income securities are normally purchased directly from the issuer, an underwriter or a market maker. Purchases include a concession paid by the issuer to the underwriter and the purchase price paid to a market maker may include the spread between the bid and asked prices.

When the Fund and another of the Adviser's or Subadviser's clients seek to purchase or sell the same security at or about the same time, the Adviser or Subadviser may execute the transaction on a combined ("blocked") basis. Blocked transactions can produce better execution for the Fund because of the increased volume of the transaction. If the entire blocked order is not filled, the Fund may not be able to acquire as large a position in such security as it desires or it may have to pay a higher price for the security. Similarly, the Fund may not be able to obtain as large an execution of an order to sell or as high a price for any particular portfolio security if the other client desires to sell the same portfolio security at the same time. In the event that the entire blocked order is not filled, the purchase or sale will normally be allocated on a pro rata basis. The Adviser or Subadviser may adjust the allocation when, taking into account such factors as the size of the individual orders and transaction costs, the Adviser or Subadviser believes an adjustment is reasonable.

The Fund paid brokerage commissions in the aggregate amount of \$154,541, \$86,646 and \$36,314 during the fiscal years ended June 30, 2023 and June 30, 2022 and the fiscal period from February 24, 2021 (commencement of operations) through June 30, 2022, respectively, not including the gross underwriting spread on securities purchased in underwritten public offerings.

The Fund did not pay any brokerage commissions during the fiscal years ended June 30, 2023 and June 30, 2022 and the period from February 24, 2021 (commencement of operations) through June 30, 2021 to any broker that (1) is an affiliated person of the Fund, (2) is an affiliated person of an affiliated person of the Fund or (3) has an affiliated person that is an affiliated person of the Fund or the Adviser.

U.S. FEDERAL INCOME TAX MATTERS

The following is a summary discussion of certain U.S. federal income tax consequences that may be relevant to a shareholder that acquires, holds and/or disposes of Securities of the Fund. This discussion only addresses U.S. federal income tax consequences to U.S. Shareholders who hold their Securities as capital assets and does not address all of the U.S. federal income tax consequences that may be relevant to particular shareholders in light of their individual circumstances. This discussion also does not address the tax consequences to shareholders who are subject to special rules, including, without limitation, banks and other financial institutions, insurance companies, dealers in securities or foreign currencies, traders in securities that have elected to mark-to-market their securities holdings, foreign holders, persons who hold their Common Shares as or in a hedge against currency risk, or as part of a constructive sale, straddle or conversion transaction, or tax-exempt or tax-deferred plans, accounts, or entities. In addition, the discussion does not address any state, local, or foreign tax consequences. The discussion reflects applicable income tax laws of the United States as of the date hereof, which tax laws may be changed or subject to new interpretations by the courts or the Internal Revenue Service ("IRS") retroactively or prospectively, which could affect the continued validity of this summary. No attempt is made to present a detailed explanation of all U.S. federal income tax concerns affecting the Fund and its shareholders, and the discussion set forth herein does not constitute tax advice. **Investors are urged to consult their own tax advisors before making an investment in the Fund to determine the specific tax consequences to them of investing in the Fund, including the applicable federal, state, local and foreign tax consequences as well as the effect of possible changes in tax laws.**

The tax legislation commonly referred to as Tax Cuts and Jobs Act (the “Tax Act”) made significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and would apply only to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules only applicable to a RIC, such as the Fund. The Tax Act, however, made numerous other changes to the tax rules that may affect Common Shareholders and the Fund. You are urged to consult with your own tax advisor regarding how the Tax Act affects your investment in the Fund.

Fund Taxation

The Fund has elected to be treated, and intends to qualify each year, as a “regulated investment company” under Subchapter M of the Code, so that it will generally not pay U.S. federal income tax on income and capital gains timely distributed (or treated as being distributed, as described below) to Common Shareholders. If the Fund qualifies as a regulated investment company and distributes to its Common Shareholders at least 90% of the sum of (i) its “investment company taxable income” as that term is defined in the Code (which includes, among other things, dividends, taxable interest, the excess of any net short-term capital gains over net long-term capital losses and certain net foreign exchange gains as reduced by certain deductible expenses) without regard to the deduction for dividends paid, and (ii) the excess of its gross tax-exempt interest, if any, over certain disallowed deductions, the Fund will be relieved of U.S. federal income tax on any income of the Fund, including long-term capital gains, distributed to Common Shareholders. However, if the Fund retains any investment company taxable income or “net capital gain” (*i.e.*, the excess of net long-term capital gain over net short-term capital loss), it will be subject to U.S. federal income tax at regular corporate federal income tax rates (currently at a maximum rate of 21%) on the amount retained. The Fund intends to distribute at least annually all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), net tax-exempt interest, if any, and net capital gain. Under the Code, the Fund will generally be subject to a nondeductible 4% federal excise tax on the portion of its undistributed ordinary income and capital gains if it fails to meet certain distribution requirements with respect to each calendar year. In order to avoid the 4% federal excise tax, the required minimum distribution is generally equal to the sum of 98% of the Fund’s ordinary income (computed on a calendar year basis, and taking into account certain deferrals and elections), plus 98.2% of the Fund’s capital gain net income (generally computed for the one-year period ending on October 31) plus undistributed amounts from prior years on which the Fund paid no federal income tax. The Fund generally intends to make distributions in a timely manner in an amount at least equal to the required minimum distribution and therefore, under normal circumstances, does not expect to be subject to this excise tax. However, the Fund may also decide to distribute less and pay the federal excise taxes.

If for any taxable year the Fund does not qualify as a regulated investment company for U.S. federal income tax purposes, it would be treated as a U.S. corporation subject to U.S. federal income tax, and possibly state and local income tax, and distributions to its Common Shareholders would not be deductible by the Fund in computing its taxable income. In such event, the Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, would generally constitute ordinary dividends, which generally would be eligible for the dividends received deduction available to corporate Common Shareholders under Section 243 of the Code, discussed below, and non-corporate Common Shareholders of the Fund generally would be able to treat such distributions as qualified dividend income eligible for reduced rates of U.S. federal income taxation, as discussed below, provided in each case that certain holding period and other requirements are satisfied.

If the Fund or an Underlying Fund invests in certain positions such as pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if the Fund or Underlying Fund elects to include market discount in income currently), the Fund or Underlying Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, the Fund must distribute, at least annually, all or substantially all of its net investment income, including such accrued income, to Common Shareholders to avoid U.S. federal income and excise taxes. Therefore, the Fund may have to dispose of its portfolio securities under disadvantageous circumstances to generate cash, or may have to leverage itself by borrowing the cash, to satisfy distribution requirements.

The Fund or an Underlying Fund may also acquire market discount bonds. A market discount bond is a security acquired in the secondary market at a price below its stated redemption price at maturity (or its adjusted issue price if it is also an original issue discount bond). If the Fund or an Underlying Fund invests in a market discount bond, it will be required for federal income tax purposes to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount unless the Fund or Underlying Fund elects to include the market discount in income as it accrues.

The Fund or an Underlying Fund may invest in debt obligations that are in the lowest rating categories or are unrated, including debt obligations of issuers not currently paying interest or who are in default. Investments in debt obligations that are at risk of or in default present special tax issues. Tax rules are not entirely clear about issues such as when the Fund or an Underlying Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless securities, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other related issues will be addressed by the Fund when, as and if it invests in such securities, in order to seek to ensure that it distributes sufficient income to preserve its status as a regulated investment company and does not become subject to U.S. federal income or excise taxes.

The Fund will not be able to offset gains distributed by one Underlying Fund in which it invests against losses realized by another Underlying Fund in which the Fund invests. Redemptions of shares in an Underlying Fund, including those resulting from changes in the allocation among Underlying Funds, could also cause additional distributable gains to Common Shareholders. A portion of any such gains may be short-term capital gains that would be distributable as ordinary income to Common Shareholders. Further, a portion of losses on redemptions of shares in the Underlying Funds may be deferred under the wash sale rules. Additionally, the Fund's investment in an Underlying Fund may result in the Fund's receipt of cash in excess of the Underlying Fund's earnings; if the Fund distributes these amounts, the distributions could constitute a return of capital to Common Shareholders for federal income tax purposes. As a result of these factors, the use of the fund of funds structure by the Fund could therefore affect the amount, timing and character of distributions to Common Shareholders.

The Fund or an Underlying Fund may engage in various transactions utilizing options, futures contracts, forward contracts, hedge instruments, straddles, and other similar transactions. Such transactions may be subject to special provisions of the Code that, among other things, affect the character of any income realized by the Fund from such investments, accelerate recognition of income to the Fund, defer Fund losses and affect the determination of whether capital gain or loss is characterized as long-term or short-term capital gain or loss. These rules could therefore affect the character, amount and timing of distributions to Common Shareholders. These provisions may also require the Fund to mark-to-market certain positions in its portfolio (*i.e.*, treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for avoiding U.S. federal income and excise taxes. In addition, certain Fund investments may produce income that will not be qualifying income for purposes of the 90% income test. The Fund will monitor its investments and transactions, will make the appropriate tax elections, and will make the appropriate entries in its books and records when it acquires an option, futures contract, forward contract, hedge instrument or other similar investment in order to mitigate the effect of these rules, prevent disqualification of the Fund as a regulated investment company and minimize the imposition of U.S. federal income and excise taxes, if possible.

The Fund's transactions in broad based equity index futures contracts, exchange-traded options on such indices and certain other futures contracts (if any) are generally considered "Section 1256 contracts" for federal income tax purposes. Any unrealized gains or losses on such Section 1256 contracts are treated as though they were realized at the end of each taxable year. The resulting gain or loss is treated as sixty percent long-term capital gain or loss and forty percent short-term capital gain or loss. Gain or loss recognized on actual sales of Section 1256 contracts is treated in the same manner. As noted below, distributions of net short-term capital gain are taxable to Common Shareholders as ordinary income while distributions of net long-term capital gain are generally taxable to Common Shareholders as long-term capital gain, regardless of how long the Common Shareholder has held Common Shares of the Fund.

The Fund's entry into a short sale transaction, an option or certain other contracts (if any) could be treated as the constructive sale of an appreciated financial position, causing the Fund to realize gain, but not loss, on the position.

If the Fund utilizes leverage through borrowing, asset coverage limitations imposed by the 1940 Act as well as additional restrictions that may be imposed by certain lenders on the payment of dividends or distributions could potentially limit or eliminate the Fund's ability to make distributions on its common stock until the asset coverage is restored. These limitations could prevent the Fund from distributing at least 90% of its investment company taxable income as is required under the Code and therefore might jeopardize the Fund's qualification as a regulated investment company and/or might subject the Fund to the nondeductible 4% federal excise tax discussed above. Upon any failure to meet the asset coverage requirements imposed by the 1940 Act, the Fund may, in its sole discretion and to the extent permitted under the 1940 Act, purchase or redeem shares of preferred stock, if any, in order to maintain or restore the requisite asset coverage and avoid the adverse consequences to the Fund and its Common Shareholders of failing to meet the distribution requirements. There can be no assurance, however, that any such action would achieve these objectives. The Fund generally will endeavor to avoid restrictions on its ability to distribute dividends.

Common Shareholder Taxation

Distributions of investment company taxable income are generally taxable as ordinary income to the extent of the Fund's current and accumulated earnings and profits. Distributions of net investment income designated by the Fund as derived from qualified dividend income will be taxed in the hands of individuals and other non-corporate taxpayers at the rates applicable to long-term capital gain, provided certain holding period and other requirements are met at both the shareholder and Fund levels. A dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (i) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning on the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before such date), (ii) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (iii) if the recipient elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest, or (iv) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the U.S. which the IRS has approved for these purposes (with the exception of dividends paid on stock of such a foreign corporation that is readily tradable on an established securities market in the U.S.) or (b) treated as a passive foreign investment company. If the Fund received dividends from an Underlying Fund that qualifies as a regulated investment company, and the Underlying Fund designates such dividends as qualified dividend income, then the Fund is permitted in turn to designate a portion of its distributions as qualified dividend income, provided the Fund meets holding period and other requirements with respect to shares of the Underlying Fund. Qualified dividend income does not include interest from fixed income securities and generally does not include income from REITs. If the Fund lends portfolio securities, amounts received by the Fund that is the equivalent of the dividends paid by the issuer on the securities loaned will not be eligible for qualified dividend income treatment. The Fund can provide no assurance regarding the portion of its dividends that will qualify for qualified dividend income treatment.

Distributions of net capital gain, if any, that are properly reported by the Fund are taxable at long-term capital gain rates for U.S. federal income tax purposes without regard to the length of time the Common Shareholder has held Common Shares of the Fund. A distribution of an amount in excess of the Fund's current and accumulated earnings and profits, if any, will be treated by a Common Shareholder as a tax-free return of capital, which is applied against and reduces the Common Shareholder's basis in his, her or its Common Shares. To the extent that the amount of any such distribution exceeds the Common Shareholder's basis in his, her or its Common Shares, the excess will be treated by the Common Shareholder as gain from the sale or exchange of such Common Shares. The U.S. federal income tax status of all distributions will be designated by the Fund and reported to Common Shareholders annually.

The Fund may qualify to pay "exempt-interest" dividends, as defined in the Code, on its Common Shares by satisfying the requirement that, at the close of each quarter of its taxable year, at least 50% of the value of its total assets consists of municipal securities. As an alternative, the Fund may qualify to pay exempt-interest dividends if it is a qualified fund-of-funds, i.e., if at least 50% of the value of its total assets are invested in the shares of underlying RICs at the close of each quarter of its taxable year. Exempt-interest dividends are dividends or any part thereof (other than a capital gain dividend) paid by the Fund which are attributable to interest on municipal securities and which are so reported by the Fund. Exempt-interest dividends will be exempt from federal income tax, subject to the possible application of the federal alternative minimum tax applicable to individuals. Interest paid on a municipal bond issued after December 31, 2017 to advance refund another municipal bond is subject to federal income tax. Insurance proceeds received by the Fund under any insurance policies in respect of scheduled interest payments on defaulted municipal bonds, as described herein, will generally be correspondingly excludable from federal gross income. In the case of non-appropriation by a political subdivision, however, there can be no assurance that payments made by the issuer representing interest on municipal lease obligations will be excludable from gross income for federal income tax purposes. Any gains of the Fund that are attributable to market discount on municipal securities are treated as ordinary income to the extent of accrued market discount on those securities.

A portion of the Fund's expenditures that would otherwise be deductible may not be allowed as deductions by reason of the Fund's investment in municipal securities (such disallowed portion, in general, being the same percentage of the Fund's aggregate expenses as the percentage of the Fund's aggregate gross income that constitutes exempt interest income from municipal securities). A similar disallowance rule also applies to interest expense paid or incurred by the Fund, if any. Any such disallowed deductions will offset the Fund's gross exempt-interest income for purposes of calculating the dividends that the Fund can report as exempt-interest dividends. Interest on indebtedness incurred or continued to purchase or carry the Fund's shares is not deductible to the extent the interest relates to exempt-interest dividends. Under rules used by the IRS for determining when borrowed funds are considered used for the purpose of purchasing or carrying particular assets, the purchase or ownership of shares may be considered to have been made with borrowed funds even though such funds are not directly used for the purchase or ownership of such shares.

Distributions to Common Shareholders of net investment income received by the Fund from taxable investments, if any, including temporary taxable investments, and of net short-term capital gains realized by the Fund, if any, will be taxable to Common Shareholders as ordinary income. Distributions by the Fund of net capital gain (i.e., the excess of net long-term capital gain over net short-term capital loss), if any, are taxable as long-term capital gain, regardless of the length of time the Common Shareholder has owned the shares with respect to which such distributions are made. The amount of taxable income allocable to the Fund's shares will depend upon the amount of such income realized by the Fund. Distributions, if any, in excess of the Fund's earnings and profits will first reduce the adjusted tax basis of a Common Shareholder's shares and, after that basis has been reduced to zero, will constitute capital gain to the Common Shareholder (assuming the shares are held as a capital asset). As long as the Fund qualifies as a RIC under the Code, it is not expected that any part of its distributions to Common Shareholders from its investments will qualify as "qualified dividend income" taxable to non-corporate Common Shareholders at reduced rates.

The interest on private activity bonds in most instances is not federally tax-exempt to a person who is a "substantial user" of a facility financed by such bonds or a "related person" of such "substantial user." As a result, the Fund may not be an appropriate investment for a Common Shareholder who is considered either a "substantial user" or a "related person" within the meaning of the Code. In general, a "substantial user" of a facility includes a "nonexempt person who regularly uses a part of such facility in his trade or business." "Related persons" are in general defined to include persons among whom there exists a relationship, either by family or business, which would result in a disallowance of losses in transactions among them under various provisions of the Code (or if they are members of the same controlled group of corporations under the Code), including a partnership and each of its partners (and certain members of their families), an S corporation and each of its shareholders (and certain members of their families) and various combinations of these and other relationships. The foregoing is not a complete description of all of the provisions of the Code covering the definitions of "substantial user" and "related person."

Federal income tax law imposes an alternative minimum tax with respect to individuals, trusts, and estates. Interest on certain municipal securities, such as bonds issued to make loans for housing purposes or to private entities (but not to certain tax-exempt organizations such as universities and non-profit hospitals), is included as an item of tax preference in determining the amount of a taxpayer's alternative minimum taxable income. To the extent that the Fund receives income from such municipal securities, a portion of the dividends paid by the Fund, although otherwise exempt from federal income tax, will be taxable to Common Shareholders whose tax liabilities are determined under the federal alternative minimum tax. The Fund will annually provide a report indicating the percentage of the Fund's income attributable to municipal securities and the portion thereof the interest on which is a tax preference item.

The Fund may invest in municipal securities that pay interest that is taxable under the federal alternative minimum tax applicable to individuals. If you are, or as a result of investment in the Fund would become, subject to the federal alternative minimum tax, the Fund may not be a suitable investment for you. In addition, distributions of taxable ordinary income (including any net short-term capital gain) will be taxable to Common Shareholders as ordinary income (and not eligible for favorable taxation as "qualified dividend income"), and capital gain dividends will be taxable as long-term capital gains.

Any loss realized by a shareholder of the Fund upon the sale of shares held for six months or less may be disallowed to the extent of any exempt-interest dividends received with respect to such shares.

Certain distributions by the Fund may qualify for the dividends received deduction available to corporate Common Shareholders under Section 243 of the Code, subject to certain holding period and other requirements, but generally only to the extent the Fund earned dividend income from stock investments in U.S. domestic corporations (but not including real estate investment trusts). Additionally, if the Fund received dividends from an Underlying Fund that qualifies as a regulated investment company, and the Underlying Fund designates such dividends as eligible for the dividends received deduction, then the Fund is permitted in turn to designate a portion of its distributions as eligible for the dividends received deduction, provided the Fund meets holding period and other requirements with respect to shares of the Underlying Fund. As long as the Fund qualifies as a RIC under the Code, it is not expected that any significant part of its distributions to Common Shareholders from its investments will qualify for the dividends-received deduction available to corporate Common Shareholders.

A Common Shareholder may elect to have all dividends and distributions automatically reinvested in Common Shares of the Fund. For U.S. federal income tax purposes, all dividends are generally taxable regardless of whether a Common Shareholder takes them in cash or they are reinvested in additional Common Shares of the Fund.

If a Common Shareholder's distributions are automatically reinvested in additional Common Shares, for U.S. federal income tax purposes, the Common Shareholder will be treated as having received a distribution in the amount of the cash dividend that the Common Shareholder would have received if the Common Shareholder had elected to receive cash, unless the distribution is in newly issued Common Shares of the Fund that are trading at or above NAV, in which case the Common Shareholder will be treated as receiving a distribution equal to the fair market value of the stock the Common Shareholder receives.

The Fund intends to distribute all realized net capital gains, if any, at least annually. If, however, the Fund were to retain any net capital gain, the Fund may designate the retained amount as undistributed capital gains in a notice to Common Shareholders who, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income, as long-term capital gain, their proportionate share of such undistributed amount, and (ii) will be entitled to credit their proportionate share of the federal income tax paid by the Fund on the undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For U.S. federal income tax purposes, the tax basis of Common Shares owned by a Common Shareholder will be increased by the difference between the amount of undistributed net capital gain included in the Common Shareholder's gross income and the federal income tax deemed paid by the Common Shareholder.

Any dividend declared by the Fund in October, November or December with a record date in such a month and paid during the following January will be treated for U.S. federal income tax purposes as paid by the Fund and received by Common Shareholders on December 31 of the calendar year in which it is declared.

At the time of an investor's purchase of the Fund's Common Shares, a portion of the purchase price may be attributable to realized or unrealized appreciation in the Fund's portfolio or undistributed taxable income of the Fund. Consequently, subsequent distributions by the Fund with respect to these Common Shares from such appreciation or income may be taxable to such investor even if the NAV of the investor's Common Shares is, as a result of the distributions, reduced below the investor's cost for such Common Shares and the distributions economically represent a return of a portion of the investment. Investors should consider the tax implications of purchasing Common Shares just prior to a distribution.

The IRS has taken the position that if a regulated investment company has two or more classes of shares, it must designate distributions made to each class in any year as consisting of no more than such class' proportionate share of particular types of income (*e.g.*, ordinary income and net capital gains). Consequently, if both common stock and preferred stock are outstanding, the Fund intends to designate distributions made to each class of particular types of income in accordance with each class' proportionate share of such income. Thus, the Fund will designate to the extent applicable, dividends qualifying for the corporate dividends received deduction (if any), income not qualifying for the dividends received deduction, qualified dividend income, ordinary income, exempt interest and net capital gain in a manner that allocates such income between the holders of common stock and preferred stock in proportion to the total dividends paid to each class during or for the taxable year, or otherwise as required by applicable law. However, for purposes of determining whether distributions are out of the Fund's current or accumulated earnings and profits, the Fund's earnings and profits will be allocated first to the Fund's preferred stock, if any, and then to the Fund's common stock. In such a case, since the Fund's current and accumulated earnings and profits will first be used to pay dividends on the preferred stock, distributions in excess of such earnings and profits, if any, will be made disproportionately to holders of common stock.

In addition, solely for the purpose of satisfying the 90% distribution requirement and the distribution requirement for avoiding federal income taxes, certain distributions made after the close of a taxable year of the Fund may be "spilled back" and treated as paid during such taxable year. In such case, Common Shareholders will be treated as having received such dividends in the taxable year in which the distribution was actually made.

Sales, exchanges and other dispositions of the Fund's Common Shares generally are taxable events for Common Shareholders that are subject to federal income tax. Common Shareholders should consult their own tax advisors regarding their individual circumstances to determine whether any particular transaction in the Fund's Common Shares is properly treated as a sale or exchange for federal income tax purposes (as the following discussion assumes) and the tax treatment of any gains or losses recognized in such transactions. Generally, gain or loss will be equal to the difference between the amount of cash and the fair market value of other property received (including securities distributed by the Fund) and the Common Shareholder's adjusted tax basis in the Common Shares sold or exchanged. In general, any gain or loss realized upon a taxable disposition of Common Shares will be treated as long-term capital gain or loss if the Common Shares have been held for more than one year. Otherwise, the gain or loss on the taxable disposition of the Fund's Common Shares will be treated as short-term capital gain or loss. However, any loss realized by a Common Shareholder upon the sale or other disposition of Common Shares with a tax holding period of six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gain with respect to such Common Shares. For the purposes of calculating the six-month period, the holding period is suspended for any periods during which the Common Shareholder's risk of loss is diminished as a result of holding one or more other positions in substantially similar or related property or through certain options, short sales or contractual obligations to sell. The maximum individual rate applicable to long-term capital gains is generally either 15% or 20%, depending on whether the individual's income exceeds certain threshold amounts. The ability to deduct capital losses may be subject to limitations. In addition, losses on sales or other dispositions of Common Shares may be disallowed under the "wash sale" rules in the event a Common Shareholder acquires substantially identical stock or securities (including those made pursuant to reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after a sale or other disposition of Common Shares. In such a case, the disallowed portion of any loss generally would be included in the U.S. federal income tax basis of the Common Shares acquired.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Common Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

From time to time, the Fund may repurchase its Common Shares. Common Shareholders who tender all Common Shares held, and those considered to be held (through attribution rules contained in the Code), by them will be treated as having sold their Common Shares and generally will realize a capital gain or loss. If a Common Shareholder tenders fewer than all of his, her or its Common Shares (including those considered held through attribution), such Common Shareholder may be treated as having received a taxable dividend upon the tender of its Common Shares. If a tender offer is made, there is a risk that non-tendering Common Shareholders will be treated as having received taxable distributions from the Fund. To the extent that the Fund recognizes net gains on the liquidation of portfolio securities to meet such tenders of Common Shares, the Fund will be required to make additional distributions to its Common Shareholders. If the Board of Directors determines that a tender offer will be made by the Fund, the federal income tax consequences of such offer will be discussed in materials that will be available at such time in connection with the specific tender offer, if any.

The Code requires that the Fund withhold, as "backup withholding," 24% of reportable payments, including dividends, capital gain distributions and the proceeds of sales or other dispositions of the Fund's stock paid to Common Shareholders who have not complied with IRS regulations. In order to avoid this withholding requirement, Common Shareholders must certify on their account applications, or on a separate IRS Form W-9, that the social security number or other taxpayer identification number they provide is their correct number and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. The Fund may nevertheless be required to withhold if it receives notice from the IRS or a broker that the number provided is incorrect or backup withholding is applicable. Backup withholding is not an additional tax. Any amount withheld may be allowed as a refund or a credit against the Common Shareholder's U.S. federal income tax liability if the appropriate information (such as the timely filing of the appropriate federal income tax return) is provided to the IRS.

Under Treasury regulations, if a Common Shareholder recognizes a loss with respect to Common Shares of \$2 million or more in a single taxable year (or \$4 million or more in any combination of taxable years) for an individual Common Shareholder, S corporation or trust or \$10 million or more in a single taxable year (or \$20 million or more in any combination of years) for a Common Shareholder who is a C corporation, such Common Shareholder will generally be required to file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are generally excepted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all regulated investment companies. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Common Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Preferred Shareholder Taxation

The IRS has taken the position that if a regulated investment company has two or more classes of shares, it must designate distributions made to each class in any year as consisting of no more than such class' proportionate share of particular types of income (*e.g.*, ordinary income and net capital gains). Consequently, if both Common Shares and Preferred Shares are outstanding, the Fund intends to designate distributions made to each class of particular types of income in accordance with each class' proportionate share of such income. Thus, the Fund will designate to the extent applicable, dividends qualifying for the corporate dividends received deduction (if any), income not qualifying for the dividends received deduction, qualified dividend income, Section 199A dividends, ordinary income and net capital gain in a manner that allocates such income between the holders of Common Shares and Preferred Shares in proportion to the total dividends paid to each class during or for the taxable year, or otherwise as required by applicable law. However, for purposes of determining whether distributions are out of the Fund's current or accumulated earnings and profits, the Fund's earnings and profits will be allocated first to the Fund's Preferred Shares, if any, and then to the Fund's Common Shares. In such a case, since the Fund's current and accumulated earnings and profits will first be used to pay dividends on the Preferred Shares, distributions in excess of such earnings and profits, if any, will be made disproportionately to holders of Common Shares.

Other Taxes

The description of certain U.S. federal income tax provisions above relates only to U.S. federal income tax consequences for Common Shareholders who are U.S. persons (*i.e.*, U.S. citizens or residents or U.S. corporations, partnerships, trusts or estates). Non-U.S. Common Shareholders should consult their tax advisors concerning the tax consequences of ownership of Common Shares of the Fund, including the possibility that distributions may be subject to a 30% U.S. withholding tax (or a reduced rate of withholding provided by an applicable treaty if the investor provides proper certification of its non-U.S. status).

A separate U.S. withholding tax may apply in the case of distributions to (i) certain non-U.S. financial institutions that have not agreed to collect and disclose certain account holder information and are not resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury and (ii) certain other non-U.S. entities that do not provide certain certifications and information about the entity's U.S. owners.

Shareholders should consult their own tax advisors on these matters and on any specific question of U.S. federal, state, local, foreign and other applicable tax laws before making an investment in the Fund.

BOARD MEMBERS AND OFFICERS

The following table presents certain information regarding the members of the Board of Directors (each, a "Board Member"). Each Board Member's year of birth is set forth in parentheses after his or her name. The Board of Directors is divided into three classes of directors serving staggered three-year terms and upon expiration of their initial terms, directors of each class will be elected to serve for three-year terms and until their successors are duly elected and qualify, and at each annual meeting one class of directors will be elected by the Common Shareholders. When there are Preferred Shares outstanding, two of the Fund's directors are elected by the holders of Preferred Shares, voting separately as a class, and the remaining directors of the Fund are elected by holders of Common Shares and Preferred Shares, voting together as a class.

Except as otherwise noted, the address for all directors and officers is 360 South Rosemary Avenue, Suite 1420, West Palm Beach, FL 33401. The "independent directors" consist of those directors who are not "interested persons" of the Fund, as that term is defined under the 1940 Act (each, an "Independent Director" and collectively, the "Independent Directors").

- (1) For all Directors other than Ms. Mougins, the Fund Complex consists of the RiverNorth Core Opportunity Fund, the RiverNorth/DoubleLine Strategic Income Fund, and the RiverNorth/Oaktree High Income Fund, each a series of the RiverNorth Funds, RiverNorth Opportunities Fund, Inc., RiverNorth/DoubleLine Strategic Opportunity Fund, Inc., RiverNorth Opportunistic Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund, Inc., RiverNorth Flexible Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund II, Inc., RiverNorth Capital and Income Fund, Inc. and the Fund. For Ms. Mougins, the Fund Complex consists of the RiverNorth Opportunities Fund, Inc., RiverNorth/DoubleLine Strategic Opportunity Fund, Inc., RiverNorth Opportunistic Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund, Inc., RiverNorth Flexible Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund II, Inc., RiverNorth Capital and Income Fund, Inc. and the Fund.
- (2) The numbers enclosed in the parentheticals represent the number of funds overseen in each respective directorship held by the director.
- (3) Patrick W. Galley is considered an “Interested” Director as defined in the 1940 Act because he is an officer of the Fund and Chief Executive Officer and Chief Investment Officer of the Adviser.
- (4) Jerry R. Raio is considered an “Interested” Director as defined in the 1940 Act because of his current position as an advisory board member of FLX Distribution, which the Adviser is an investor in and Mr. Galley is a Director of; and because of his prior position as Managing Director – Head of Retail Origination at Wells Fargo Securities, LLC, which had previously served as a broker and principal underwriter for certain funds advised by the Adviser.

Board Leadership Structure. The Board of Directors, which has overall responsibility for the oversight of the Fund’s investment programs and business affairs, believes that it has structured itself in a manner that allows it to effectively perform its oversight obligations. Mr. Patrick W. Galley, the Chairman of the Board of Directors (“Chairman”), is not an Independent Director. The Board of Directors believes that the use of an interested director as Chairman is the appropriate leadership structure for the Fund given (i) Mr. Patrick Galley’s role in the day to day operations of the Adviser, (ii) the extent to which the work of the Board of Directors is conducted through the Audit Committee of the Board of Directors (the “Audit Committee”) and the Nominating and Corporate Governance Committee of the Board of Directors (the “Nominating and Corporate Governance Committee”), each of whose meetings is chaired by an Independent Director, (iii) the frequency that Independent Directors meet with their independent legal counsel and auditors in the absence of members of the Board of Directors who are interested directors of the Fund and management, and (iv) the overall sophistication of the Independent Directors, both individually and collectively. The members of the Board of Directors also complete an annual self-assessment during which the directors review their overall structure and consider where and how its structure remains appropriate in light of the Fund’s current circumstances. The Chairman’s role is to preside at all meetings of the Board of Directors and in between meetings of the Board of Directors to generally act as the liaison between the Board of Directors and the Fund’s officers, attorneys and various other service providers, including but not limited to the Adviser and other such third parties servicing the Fund. The Board of Directors believes that having an interested person serve as Chairman of the Board of Directors enables Mr. Galley to more effectively carry out these liaison activities. The Board of Directors also believes that it benefits during its meetings from having a person intimately familiar with the operation of the Fund to set the agenda for meetings of the Board of Directors to ensure that important matters are brought to the attention of and considered by the Board of Directors.

The Fund has two standing committees, each of which enhances the leadership structure of the Board of Directors: the Audit Committee and the Nominating and Corporate Governance Committee. The Audit Committee and Nominating and Corporate Governance Committee are each chaired by, and composed of, members who are Independent Directors.

The Audit Committee is comprised of Ms. Mougin and Messrs. Carter, Hutchens and Swanson, all of whom are “independent” as defined in the listing standard of the NYSE. Mr. Hutchens is the Chair of the Audit Committee and has been determined to qualify as an “audit committee financial expert” as such term is defined in Form N-CSR. The role of the Audit Committee is to assist the Board of Directors in its oversight of (i) the quality and integrity of the Fund’s financial statements, reporting process and the independent registered public accounting firm (the “independent accountants”) and reviews thereof, (ii) the Fund’s accounting and financial reporting policies and practices, its internal controls and, as appropriate, the internal controls of certain service providers, (iii) the Fund’s compliance with certain legal and regulatory requirements, and (iv) the independent accountants’ qualifications, independence and performance. The Audit Committee is also required to prepare an audit committee report pursuant to the rules of the SEC for inclusion in the Fund’s annual proxy statement. The Audit Committee operates pursuant to the Audit Committee Charter that is reviewed and approved annually. As set forth in the Audit Committee Charter, management is responsible for maintaining appropriate systems for accounting and internal control, and the Fund’s independent accountants are responsible for planning and carrying out proper audits and reviews. The independent accountants are ultimately accountable to the Board of Directors and to the Audit Committee, as representatives of the Common Shareholders. The independent accountants for the Fund report directly to the Audit Committee. The Audit Committee met three times during the fiscal year ended June 30, 2023.

The Nominating and Corporate Governance Committee is comprised of Ms. Mougin and Messrs. Carter, Hutchens and Swanson. Mr. Swanson is the Chair of the Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee is responsible for identifying and recommending to the Board of Directors individuals believed to be qualified to become members of the Board of Directors in the event that a position is vacated or created. The Nominating and Corporate Governance Committee will consider director candidates recommended by Common Shareholders. In considering candidates submitted by Common Shareholders, the Nominating and Corporate Governance Committee will take into consideration the needs of the Board of Directors, the qualifications of the candidate and the interests of Common Shareholders. Common Shareholders wishing to recommend candidates to the Nominating and Corporate Governance Committee should submit such recommendations to the Secretary of the Fund at the principal executive office of the Fund, who will forward the recommendations to the committee for consideration. The submission must include: (i) whether the Common Shareholder proposing such nominee believes the proposed nominee is, or is not, an “interested person”, (ii) the name and address, as they appear on the Fund’s books, of the Common Shareholder proposing such business or nomination, (iii) a representation that the Common Shareholder is a holder of record of Shares entitled to vote at such meeting and intends to appear in person or by proxy at the meeting to present such nomination; (iv) whether the Common Shareholder plans to deliver or solicit proxies from other Common Shareholders; (v) the class and number of Shares of the capital stock of the Fund, which are beneficially owned by the Common Shareholder and the proposed nominee to the Board of Directors, (vi) any material interest of the Common Shareholder or nominee in such business; (vii) the extent to which such Common Shareholder (including such Common Shareholder’s principals) or the proposed nominee to the Board of Directors has entered into any hedging transaction or other arrangement with the effect or intent of mitigating or otherwise managing profit, loss or risk of changes in the value of the Shares or the daily quoted market price of the Fund held by such Common Shareholder (including the Common Shareholder’s principals) or the proposed nominee, including independently verifiable information in support of the foregoing; (viii) any substantial interest, direct or indirect, of such Common Shareholder or the proposed nominee in the Fund other than interest arising from ownership of Common Shares; (ix) to the extent known by such Common Shareholder, the name and address of any other Common Shareholder supporting the proposed nominee; (x) the nominee holder for, and number of, Common Shares owned beneficially but not of record by such Common Shareholder; (xi) the investment strategy or objective, if any, of such Common Shareholder who is not an individual and a copy of the prospectus, offering memorandum, or similar document, if any; and (xii) such other information regarding such nominee proposed by such Common Shareholder as would be required to be included in a proxy statement filed pursuant to Regulation 14A under the Securities Exchange Act of 1934, as amended. Each eligible Common Shareholder or Common Shareholder group may submit no more than one Independent Director nominee each calendar year. The Nominating and Corporate Governance Committee has not determined any minimum qualifications necessary to serve as a director of the Fund. The Nominating and Corporate Governance Committee operates pursuant to the Nominating and Corporate Governance Committee Charter that is reviewed and approved annually. The Nominating and Corporate Governance Committee met three times during the fiscal year ended June 30, 2023.

Director Qualifications.

Interested Directors

Mr. Patrick Galley is the Chief Executive Officer and Chief Investment Officer for the Adviser. He is also the President and a portfolio manager of the Fund. His knowledge regarding the investment strategy of the Fund, more specifically the CEF industry, makes him uniquely qualified to serve as the Fund's President.

Mr. Raio has many years of experience in the securities industry, including management roles in the banking and investment management industries. He has more than 15 years of experience in equity capital markets, having worked on the retail syndicate desks at both Citigroup and Morgan Stanley. Since 2018, he has served as President and CEO of Arbor Lane Advisors, Inc. He served as the Managing Director and Head of Retail Origination for Wells Fargo Securities, LLC from 2005 to 2018. Prior to working at Wells Fargo, he served as Director and Head of Closed-End Funds for Citigroup Asset Management. He also serves on the Board of each of FLX Distribution; Qudos Technologies; and Quantify Crypto. He was selected to serve as a Director of the Fund based on his business, financial services and investment management experience.

Independent Directors

Mr. John K. Carter possesses extensive mutual fund industry experience. Mr. Carter served as a Business Unit Head at Transamerica Asset Management, a subsidiary of Aegon, N.V. Mr. Carter oversaw the mutual fund servicing, operations and advisory services for Transamerica's approximately 120 mutual funds. He also served as a compliance officer. Mr. Carter brings experience managing a large mutual fund complex, including experience overseeing multiple sub-advisers. Mr. Carter is currently an attorney in private practice and was previously an investment management attorney with experience as in-house counsel, serving with the SEC and in private practice with a large law firm. The Board of Directors feels Mr. Carter's industry-specific experience, including as a chairman of another fund complex, as a compliance officer and as an experienced investment management attorney will be valuable to the Board of Directors, particularly when dealing with complex legal issues.

Ms. Mougín is an experienced senior executive with many years of investment management industry experience in sales, client relationship and operations. Ms. Mougín is the Chief Investment Officer of Capital Sisters International, a non-profit that helps women entrepreneurs by providing investments and small business loans. Before joining Capital Sisters International, Ms. Mougín was the President and Chief Operating Officer of the TIFIN affiliated Positively and Louise platforms. Prior to that, Ms. Mougín was a member of the executive team that built ALPS Fund Services Inc. into a leader in the mutual fund and hedge fund industries.

Mr. Hutchens was President and CEO of the University of Colorado (CU) Foundation from April 2006 to December 2012 and Executive Director for the CU Real Estate Foundation from April 2009 to December 2012. Prior to these positions, Mr. Hutchens spent over 30 years in the banking industry, retiring as Chairman of Chase Bank Colorado. Mr. Hutchens is a graduate of the University of Colorado Boulder's School of Business and has done graduate study at Syracuse University and the University of Colorado. He was selected to serve as a Director of the Fund based on his business and financial services experience.

Mr. Swanson founded SwanDog Marketing, a marketing consulting firm to asset managers, in 2006. He currently serves as SwanDog's Managing Partner. He has over 30 years of senior management and marketing experience, with approximately 20 years in financial services. Before joining SwanDog, Mr. Swanson most recently served as Executive Vice President and Head of Distribution for Calamos Investments, an investment management firm. He previously held positions as Chief Operating Officer of Van Kampen Investments, President and CEO of Scudder, Stevens & Clark, Canada, Ltd. and Managing Director and Head of Global Investment Products at Morgan Stanley. Mr. Swanson holds a Master of Management from the Kellogg Graduate School of Management at Northwestern University and a Bachelors in Journalism from Southern Illinois University. He was selected to serve as a Director of the Fund based on his business, financial services and investment management experience.

Risk Oversight. The Fund is confronted with a multitude of risks, such as investment risk, counterparty risk, valuation risk, political risk, risk of operational failures, business continuity risk, regulatory risk, legal risk and other risks not listed here. The Board of Directors recognizes that not all risks that may affect the Fund can be known, eliminated or even mitigated. In addition, there are some risks that may not be cost effective or an efficient use of the Fund's limited resources to moderate. As a result of these realities, the Board of Directors, through its oversight and leadership, has and will continue to deem it necessary for Common Shareholders to bear certain and undeniable risks, such as investment risk, in order for the Fund to operate in accordance with its Prospectus, SAI and other related documents.

However, the Board of Directors has adopted on the Fund’s behalf a vigorous risk program that mandates the Fund’s various service providers, including the Adviser and Subadviser, to adopt a variety of processes, procedures and controls to identify various risks, mitigate the likelihood of adverse events from occurring and/or attempt to limit the effects of such adverse events on the Fund. The Board of Directors fulfills its leadership role by receiving a variety of quarterly written reports prepared by the Fund’s Chief Compliance Officer (“CCO”) that (i) evaluate the operation, policies and procedures of the Fund’s service providers, (ii) make known any material changes to the policies and procedures adopted by the Fund or its service providers since the CCO’s last report, and (iii) disclose any material compliance matters that occurred since the date of the last CCO report. In addition, the Independent Directors meet quarterly in executive sessions without the presence of any interested directors, the Adviser or Subadviser, or any of their affiliates. This configuration permits the Independent Directors to effectively receive the information and have private discussions necessary to perform their risk oversight role, exercise independent judgment and allocate areas of responsibility between the full Board of Directors, its committees and certain officers of the Fund. Furthermore, the Independent Directors have engaged independent legal counsel and auditors to assist the Independent Directors in performing their oversight responsibilities. As discussed above and in consideration of other factors not referenced herein, the Board of Directors has determined its leadership role concerning risk management as one of oversight and not active management of the Fund’s day-to-day risk management operations.

Compensation. The Fund pays no salaries or compensation to its officers or to any Interested Directors employed by the Adviser or Subadviser, and the Fund has no employees. In addition, the Adviser (not the Fund) is responsible for paying the Director compensation out of its unified management fee. For their services, the Directors of the Fund who are not employed by the Adviser or Subadviser, receive an annual retainer in the amount of \$16,500, and an additional \$ 1,500 for attending each quarterly meeting of the Board of Directors. In addition, the lead Independent Director receives \$250 annually, the Chair of the Audit Committee receives \$500 annually and the Chair of the Nominating and Corporate Governance Committee receives \$250 annually. The Directors not employed by the Adviser or Subadviser are also reimbursed for all reasonable out-of-pocket expenses relating to attendance at meetings of the Board of Directors. The following tables show compensation with respect to the Fund and the Fund Complex for the fiscal year ended June 30, 2023. Patrick W. Galley is an interested person of the Fund and employed by the Adviser and does not receive any compensation from the Fund.

Name of Board Member	Aggregate Compensation with respect to the Fund (1)	Aggregate Total Compensation with respect to the Fund and Fund Complex (2)
John K. Carter	\$22,750	\$231,375
John S. Oakes(3)	\$11,375	\$118,250
J. Wayne Hutchens	\$23,000	\$229,000
David M. Swanson	\$22,625	\$225,375
Lisa B. Mougins(4)	\$11,250	\$91,250
Jerry Raio	\$22,500	\$203,500

- (1) The Adviser, not the Fund, paid all compensation to the Directors described above out of its unified management fee.
- (2) For all Directors other than Ms. Mougins, the Fund Complex consists of the RiverNorth Core Opportunity Fund, the RiverNorth/DoubleLine Strategic Income Fund, and the RiverNorth/Oaktree High Income Fund, each a series of the RiverNorth Funds, RiverNorth Opportunities Fund, Inc., RiverNorth/DoubleLine Strategic Opportunity Fund, Inc., RiverNorth Opportunistic Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund, Inc., RiverNorth Flexible Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund II, Inc., RiverNorth Capital and Income Fund, Inc. and the Fund. For Ms. Mougins, the Fund Complex consists of the RiverNorth Opportunities Fund, Inc., RiverNorth/DoubleLine Strategic Opportunity Fund, Inc., RiverNorth Opportunistic Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund, Inc., RiverNorth Flexible Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund II, Inc., RiverNorth Capital and Income Fund, Inc. and the Fund.

- (3) Mr. Oakes retired as a Director as of November 8, 2022.
- (4) Ms. Mougín became a Director effective November 8, 2022.

Director Ownership in the Fund

The following table shows the dollar range of equity securities beneficially owned by each director in the Fund and Fund Complex as of December 31, 2022.

Director	Dollar Range of Beneficial Ownership in Fund	Aggregate Dollar Range of Ownership in all Funds Overseen by Director in the Fund Complex (1)
Independent Director:		
John K. Carter	None	\$50,001 - \$100,000
J. Wayne Hutchens	\$50,001-\$100,000	Over \$100,000
David M. Swanson	None	\$50,001-\$100,000
Lisa B. Mougín(2)	None	None
Interested Director:		
Patrick W. Galley	None	Over \$100,000
Jerry R. Raio	None	Over \$100,000

- (1) For all Directors other than Ms. Mougín, the Fund Complex consists of the RiverNorth Core Opportunity Fund, the RiverNorth/DoubleLine Strategic Income Fund, and the RiverNorth/Oaktree High Income Fund, each a series of the RiverNorth Funds, RiverNorth Opportunities Fund, Inc., RiverNorth/DoubleLine Strategic Opportunity Fund, Inc., RiverNorth Opportunistic Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund, Inc., RiverNorth Flexible Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund II, Inc., RiverNorth Capital and Income Fund, Inc. and the Fund. For Ms. Mougín, the Fund Complex consists of the RiverNorth Opportunities Fund, Inc., RiverNorth/DoubleLine Strategic Opportunity Fund, Inc., RiverNorth Opportunistic Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund, Inc., RiverNorth Flexible Municipal Income Fund, Inc., RiverNorth Managed Duration Municipal Income Fund II, Inc., RiverNorth Capital and Income Fund, Inc. and the Fund.

(2) Ms. Mougín became a Director effective November 8, 2022.

As of the date of this SAI, the Independent Directors of the Fund and immediate family members do not own beneficially or of record any class of securities of the investment adviser or principal underwriter of the Fund or any person directly or indirectly controlling, controlled by, or under common control with an investment adviser or principal underwriter of the Fund.

As of the date of this SAI, the directors and officers of the Fund owned, as a group, less than 1% of the outstanding Common Shares of the Fund.

Securities Beneficially Owned

To the knowledge of the Fund, as of September 18, 2023, no single shareholder or “group” (as that term is used in Section 13(d) of the Securities Exchange Act of 1934, as amended (the “1934 Act”)) beneficially owned more than 5% of the Fund’s outstanding Common Shares. A control person is one who owns, either directly or indirectly, more than 25% of the voting securities of the Fund or acknowledges the existence of control.

PROXY VOTING GUIDELINES

The Board of Directors of the Fund has delegated responsibilities for decisions regarding proxy voting for securities held by the Fund to the Adviser or Subadviser. The Adviser or Subadviser will vote such proxies in accordance with its proxy policies and procedures. In some instances, the Adviser or Subadviser may be asked to cast a proxy vote that presents a conflict between the interests of the Fund’s shareholders, and those of the Adviser or Subadviser or an affiliated person of the Adviser or Subadviser. In such a case, the Adviser or Subadviser will abstain from making a voting decision and will forward all necessary proxy voting materials to the Fund to enable the Board of Directors to make a voting decision. The Adviser or Subadviser shall make a written recommendation of the voting decision to the Board of Directors, which shall include: (i) an explanation of why it has a conflict of interest; (ii) the reasons for its recommendation; and (iii) an explanation of why the recommendation is consistent with the Adviser’s (or Subadviser’s) proxy voting policies. The Board of Directors shall make the proxy voting decision that in its judgment, after reviewing the recommendation of the Adviser or Subadviser, is most consistent with the Adviser’s or Subadviser’s proxy voting policies and in the best interests of shareholders. When the Board of Directors of the Fund is required to make a proxy voting decision, only the directors without a conflict of interest with regard to the security in question or the matter to be voted upon shall be permitted to participate in the decision of how the Fund’s vote will be cast. The Adviser and Subadviser vote proxies pursuant to the proxy voting policies and guidelines set forth in Appendix A and B, respectively, to this SAI.

You may also obtain information about how the Fund voted proxies related to its portfolio securities during the 12-month period ended June 30 by visiting the SEC’s website at www.sec.gov or by visiting the Fund’s website at www.rivernorth.com (this reference to the Fund’s website does not incorporate the contents of the website into this SAI).

ADDITIONAL INFORMATION

A Registration Statement on Form N-2, including amendments thereto, relating to the Securities offered hereby, has been filed by the Fund with the SEC. The Fund’s Prospectus and this SAI do not contain all of the information set forth in the Registration Statement, including any exhibits and schedules thereto. For further information with respect to the Fund and the Securities offered hereby, reference is made to the Fund’s Registration Statement. Statements contained in the Fund’s Prospectus and this SAI as to the contents of any contract or other document referred to are not necessarily complete and in each instance reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement, each such statement being qualified in all respects by such reference.

The Registration Statement is available on the Edgar Database on the SEC's website, <http://www.sec.gov>, or may be obtained, after paying a duplicating fee, by electronic request to publicinfo@sec.gov.

FINANCIAL STATEMENTS

The audited financial statements and financial highlights included in the annual report to the Fund's shareholders for the fiscal year ended June 30, 2023 (the "2023 Annual Report"), together with the report of Cohen & Company, Ltd., the Fund's independent registered public accounting firm, on the financial statements and financial highlights included in the Fund's 2023 Annual Report are incorporated herein.

APPENDIX A

PROXY VOTING POLICY OF THE ADVISER

Proxy Voting RiverNorth Capital Management, LLC

PROXY VOTING POLICIES AND PROCEDURES

Pursuant to the recent adoption by the Securities and Exchange Commission (the “Commission”) of Rule 206(4)-6 (17 CFR 275.206(4)-6) and amendments to Rule 204-2 (17 CFR 275.204-2) under the Investment Advisers Act of 1940 (the “Act”), it is a fraudulent, deceptive, or manipulative act, practice or course of business, within the meaning of Section 206(4) of the Act, for an investment adviser to exercise voting authority with respect to client securities, unless (i) the adviser has adopted and implemented written policies and procedures that are reasonably designed to ensure that the adviser votes proxies in the best interests of its clients, (ii) the adviser describes its proxy voting procedures to its clients and provides copies on request, and (iii) the adviser discloses to clients how they may obtain information on how the adviser voted their proxies.

In its standard investment advisory agreement, RiverNorth Capital Management, LLC (RiverNorth Capital) specifically states that it does not vote proxies and the client, including clients governed by ERISA, is responsible for voting proxies. Therefore, RiverNorth Capital will not vote proxies for these clients. However, RiverNorth Capital will vote proxies on behalf of investment company clients (“Funds”). RiverNorth Capital has instructed all custodians, other than Fund custodians, to forward proxies directly to its clients, and if RiverNorth Capital accidentally receives a proxy for any non-Fund client, current or former, the Chief Compliance Officer will promptly forward the proxy to the client. In order to fulfill its responsibilities to Funds, RiverNorth Capital Management, LLC (hereinafter “we” or “our”) has adopted the following policies and procedures for proxy voting with regard to companies in any Fund’s investment portfolios.

KEY OBJECTIVES

The key objectives of these policies and procedures recognize that a company’s management is entrusted with the day-to-day operations and longer term strategic planning of the company, subject to the oversight of the company’s board of directors. While “ordinary business matters” are primarily the responsibility of management and should be approved solely by the corporation’s board of directors, these objectives also recognize that the company’s shareholders must have final say over how management and directors are performing, and how shareholders’ rights and ownership interests are handled, especially when matters could have substantial economic implications to the shareholders.

Therefore, we will pay particular attention to the following matters in exercising our proxy voting responsibilities as a fiduciary for our clients:

Accountability. Each company should have effective means in place to hold those entrusted with running a company’s business accountable for their actions. Management of a company should be accountable to its board of directors and the board should be accountable to shareholders.

Alignment of Management and Shareholder Interests. Each company should endeavor to align the interests of management and the board of directors with the interests of the company’s shareholders. For example, we generally believe that compensation should be designed to reward management for doing a good job of creating value for the shareholders of the company.

Transparency. Promotion of timely disclosure of important information about a company's business operations and financial performance enables investors to evaluate the performance of a company and to make informed decisions about the purchase and sale of a company's securities.

DECISION METHODS

We generally believe that the individual portfolio managers that invest in and track particular companies are the most knowledgeable and best suited to make decisions with regard to proxy votes. Therefore, we rely on those individuals to make the final decisions on how to cast proxy votes.

No set of proxy voting guidelines can anticipate all situations that may arise. In special cases, we may seek insight from our managers and analysts on how a particular proxy proposal will impact the financial prospects of a company, and vote accordingly.

In some instances, a proxy vote may present a conflict between the interests of a client, on the one hand, and our interests or the interests of a person affiliated with us, on the other. In such a case, we will abstain from making a voting decision and will forward all of the necessary proxy voting materials to the client to enable the client to cast the votes.

Notwithstanding the forgoing, the following policies will apply to investment company shares owned by a Fund. Under Section 12(d)(1) of the Investment Company Act of 1940, as amended, (the "1940 Act"), a fund may only invest up to 5% of its total assets in the securities of any one investment company, but may not own more than 3% of the outstanding voting stock of any one investment company or invest more than 10% of its total assets in the securities of other investment companies. However, Section 12(d)(1)(F) of the 1940 Act provides that the provisions of paragraph 12(d)(1) shall not apply to securities purchased or otherwise acquired by a fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the fund and all affiliated persons of the fund; and (ii) the fund is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price which includes a sales load of more than 1½% percent. Therefore, each Fund (or the Adviser acting on behalf of the Fund) must comply with the following voting restrictions unless it is determined that the Fund is not relying on Section 12(d)(1)(F):

- when the Fund exercises voting rights, by proxy or otherwise, with respect to any investment company owned by the Fund, the Fund will either
 - seek instruction from the Fund's shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or
 - vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

PROXY VOTING GUIDELINES

Election of the Board of Directors

We believe that good corporate governance generally starts with a board composed primarily of independent directors, unfettered by significant ties to management, all of whose members are elected annually. We also believe that turnover in board composition promotes independent board action, fresh approaches to governance, and generally has a positive impact on shareholder value. We will generally vote in favor of non-incumbent independent directors.

The election of a company's board of directors is one of the most fundamental rights held by shareholders. Because a classified board structure prevents shareholders from electing a full slate of directors annually, we will generally support efforts to declassify boards or other measures that permit shareholders to remove a majority of directors at any time, and will generally oppose efforts to adopt classified board structures.

Approval of Independent Auditors

We believe that the relationship between a company and its auditors should be limited primarily to the audit engagement, although it may include certain closely related activities that do not raise an appearance of impaired independence.

We will evaluate on a case-by-case basis instances in which the audit firm has a substantial non-audit relationship with a company to determine whether we believe independence has been, or could be, compromised.

Equity-based compensation plans

We believe that appropriately designed equity-based compensation plans, approved by shareholders, can be an effective way to align the interests of shareholders and the interests of directors, management, and employees by providing incentives to increase shareholder value. Conversely, we are opposed to plans that substantially dilute ownership interests in the company, provide participants with excessive awards, or have inherently objectionable structural features.

We will generally support measures intended to increase stock ownership by executives and the use of employee stock purchase plans to increase company stock ownership by employees. These may include:

1. Requiring senior executives to hold stock in a company.
2. Requiring stock acquired through option exercise to be held for a certain period of time.

These are guidelines, and we consider other factors, such as the nature of the industry and size of the company, when assessing a plan's impact on ownership interests.

Corporate Structure

We view the exercise of shareholders' rights, including the rights to act by written consent, to call special meetings and to remove directors, to be fundamental to good corporate governance.

Because classes of common stock with unequal voting rights limit the rights of certain shareholders, we generally believe that shareholders should have voting power equal to their equity interest in the company and should be able to approve or reject changes to a company's by-laws by a simple majority vote.

We will generally support the ability of shareholders to cumulate their votes for the election of directors.

Shareholder Rights Plans

While we recognize that there are arguments both in favor of and against shareholder rights plans, also known as poison pills, such measures may tend to entrench current management, which we generally consider to have a negative impact on shareholder value. Therefore, while we will evaluate such plans on a case by case basis, we will generally oppose such plans.

CLIENT INFORMATION

A copy of these Proxy Voting Policies and Procedures is available to our clients, without charge, upon request, by calling 1-800-646-0148. We will send a copy of these Proxy Voting Policies and Procedures within three business days of receipt of a request, by first-class mail or other means designed to ensure equally prompt delivery.

In addition, we will provide each client, without charge, upon request, information regarding the proxy votes cast by us with regard to the client's securities.

APPENDIX B

MACKay SHIELDS LLC

Proxy Voting Policies and Procedures

Revised January 2022

1. Introduction

MacKay Shields LLC (“MacKay Shields” or the “Firm”), has adopted these “Proxy Voting Policy and Procedures” (the “Policy”) to ensure the Firm’s compliance with Rule 206(4)-6 under the Investment Advisers Act of 1940, as amended (the “Advisers Act”) and other applicable fiduciary obligations. The Policy applies to proxies relating to securities held by clients of MacKay Shields who have delegated the responsibility of voting proxies to the Firm. The Policy is designed to assist Firm employees in meeting their specific responsibilities in this area and to reasonably ensure that proxies are voted in the best interests of the Firm’s clients.

2. Statement of Policy

2.1 It is the policy of MacKay Shields that where the Firm has voting authority, all proxies are to be voted in the best interest of the client without regard to the interests of MacKay Shields or other related parties. Specifically, MacKay Shields shall not subordinate the interests of clients to unrelated objectives, including MacKay Shields’ interests. MacKay Shields shall act with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims. For purposes of the Policy, the “best interests of clients” shall mean, unless otherwise specified by the client, the clients’ best economic interests over the long term as determined by MacKay Shields – that is, the common interest that all MacKay Shields clients share in seeing the value of a common investment increase over time. It is further the policy of the Firm that complete and accurate disclosure concerning its proxy voting policies and procedures and proxy voting records as required by the Advisers Act, be made available to its clients.

2.2 When proxies with respect to securities held by clients of MacKay Shields have not been received by MacKay Shields or its proxy voting service provider, MacKay Shields will make reasonable efforts to obtain missing proxies. MacKay Shields is not responsible for voting proxies it or its proxy voting service provider does not receive.

2.3 MacKay Shields may choose not to vote proxies when it believes that it is appropriate. This may occur, without limitation, under the following circumstances:

- If the effect on the client’s economic interests or the value of the portfolio holding is indeterminable or insignificant;
- If the cost of voting the proxy outweighs the possible benefit to the client; or
- If a jurisdiction imposes share blocking restrictions which prevent the Firm from trading shares.

3. Use of Third Party Proxy Voting Service Provider

To discharge its responsibility, MacKay Shields has examined third-party services that assist in the researching and voting of proxies and the development of voting guidelines. After such review, the Firm has selected Institutional Shareholder Services, Inc., (“ISS”), to research voting proposals, analyze the financial implications of voting proposals and vote proxies. MacKay Shields utilizes the research and analytical services, operational implementation, administration, record-keeping and reporting services provided by ISS.

4. Proxy Voting Guidelines

4.1 To the extent that a client has authorized MacKay Shields to vote proxies on its behalf, and except as set forth Sections 6 & 7 of this Policy or at otherwise directed by a client in writing, MacKay has determined to adopt the following proxy voting guidelines:

4.1.a Proxies for non-union clients will generally be voted in accordance with the voting recommendations contained in the applicable ISS non-union domestic or global proxy voting guidelines, as in effect from time-to-time (“Non-Union Guidelines”). Refer to Exhibit A for the current U.S. Summary Proxy Voting Guidelines.

4.1.b Proxies for union or Taft-Hartley clients will generally be voted in accordance with the voting recommendations contained in the applicable ISS Taft- Hartley domestic or international proxy voting guidelines, as in effect from time- to-time (“Union Guidelines”). Refer to Exhibit B for the current U.S. and International Taft-Hartley Proxy Voting Guidelines.

4.1.c Notwithstanding Section 4.1.a of this Policy, proxies for non-union clients whose investment strategy directs MacKay Shields to invest primarily in assets that satisfy Environmental, Social and Governance (“ESG”) criteria, as determined by MacKay Shields, in its discretion, will be voted in accordance with the voting recommendations contained in the applicable ISS Sustainability U.S. or International proxy voting guidelines, as in effect from time-to-time (“Sustainability Guidelines”). Refer to Exhibit C for the current U.S. and International Sustainability Proxy Voting Guidelines.

4.2 For purposes of the Policy, the Non-Union Guidelines, Union Guidelines, and Sustainability Guidelines are collectively referred to as the “Standard Guidelines.”

4.3 A client may choose to use proxy voting guidelines different from the Standard Guidelines (“Custom Guidelines”). Any Custom Guidelines must be furnished by the client to MacKay Shields in writing and MacKay Shields will general vote proxies for any such client in accordance with the applicable Custom Guidelines.

4.4 In the event the Standard Guidelines or any client’s Custom Guidelines do not address how a proxy should be voted or state that the vote is to be determined on a “case- by-case” basis, the proxy will be voted in accordance with ISS recommendations, subject to Section 6. In the event that ISS has not made a recommendation, MacKay Shields will follow the procedure set forth in Section 7.

4.5 For clients using the Standard Guidelines, the Firm will instruct ISS to cast votes in accordance with the Standard Guidelines. For clients using Custom Guidelines, the Firm will provide ISS with a copy of such Custom Guidelines and will instruct ISS to cast votes in accordance with such Custom Guidelines. ISS will cast votes in accordance with the Standard Guidelines or Custom Guidelines, as the case may be, unless instructed otherwise by MacKay Shields as set forth in Sections 6 and 7. Upon receipt of a specific request from a client pursuant to Section 4.6, the Firm will instruct ISS to cast such client’s proxy in accordance with such request.

4.6 Notwithstanding the foregoing, MacKay Shields will vote a proxy with respect to a particular security held by a client in accordance with such client’s specific request even if it is in a manner inconsistent with the Standard Guidelines or the client’s Custom Guidelines, as the case may be. Any such specific requests must be furnished to MacKay Shields by the client in writing and must be received by MacKay on a timely basis for instructing ISS how to cast the vote.

4.7 In an effort to avoid possible conflicts of interest, MacKay Shields has determined to generally vote proxies based on the Standard Guidelines or a client's Custom Guidelines, as the case may be. For the avoidance of doubt, however, it is recognized that the Firm's portfolio management teams have the ultimate responsibility for determining how to vote proxies in the best interest of a client voting.

5. Client Account Set-up and Review

5.1 Initially, MacKay Shields must verify whether the client has duly authorized MacKay Shields to vote proxies on its behalf, or if the client has retained the responsibility of voting proxies. The Marketing and Client Services departments, in conjunction with the Legal and/or Compliance Department, will have primary responsibility for making that determination. MacKay's Compliance Department will be responsible for ensuring that a record of each client's proxy voting status and, to the extent applicable, the type of proxy voting guidelines is maintained. In its sole discretion, the Firm may decline to accept authority to vote a client's proxies. Any such refusal shall be in writing.

5.2 In most cases, the delegation of voting authority to MacKay Shields, and the Firm's use of a third-party proxy voting service provider shall be memorialized in the client's investment management agreement.

5.3 MacKay Shields shall notify ISS of new client accounts using such form as ISS shall specify from time to time. Designated personnel within the Firm will be responsible for ensuring that each new client's account for which the Firm has proxy voting authority is established on the appropriate systems and that each such account is properly coded for voting under the appropriate Non-Union Guidelines, Union Guidelines or Custom Guidelines, as the case may be.

6. Overriding Guidelines

A portfolio manager may propose that a particular proxy vote be cast in a manner different from the Standard Guidelines or an ISS voting recommendation, or may propose an abstention from voting, if they believe that to do so, based on all facts and circumstances, is in the best interest of the Firm's clients as a whole. Any portfolio manager who proposes to override the Standard Guidelines or an ISS voting recommendation on a particular vote or to abstain from voting must complete a Proxy Vote Override/Decision Form, which is set forth in Schedule D.

7. Referral of Voting Decision by ISS to MacKay Shields

7.1 In the event that the Standard Guidelines or a client's Custom Guidelines do not address how a proxy should be voted on a specific proposal for an issuer and ISS has not made a recommendation as to how such proxy should be voted, ISS will so advise MacKay Shields. In that event, the Legal and/or Compliance Departments will request that the appropriate portfolio manager makes a voting recommendation and complete a Proxy Vote Override/Decision Form.

7.2 In the event that the Standard Guidelines or a client's Custom Guidelines require a "case-by-case" determination on a particular proxy vote and ISS has not made a recommendation as to how such proxy should be voted, ISS will so advise MacKay Shields. In that event, the Legal and/or Compliance Departments will request that the appropriate portfolio manager make a voting recommendation and complete a Proxy Vote Override/Decision Form.

7.3 In the event that ISS determines that a conflict of interest exists as a result of which ISS is precluded from making a recommendation as to how a proxy should be voted on a specific proposal for an issuer, ISS will so advise MacKay Shields. In that event, the Legal and/or Compliance Departments will request that the appropriate portfolio manager make a voting recommendation and complete a Proxy Vote Override/Decision Form.

8. Conflicts of Interest

8.1 The Firm's portfolio managers may make proxy voting decisions in connection with (i) overriding the Standard Guidelines or an ISS voting recommendation pursuant to Section 6, or (ii) deciding on a vote pursuant to Section 7. In such event, the portfolio managers have an affirmative duty to disclose to the Legal and/or Compliance Departments any potential conflict of interest known to them that exists between the Firm and the client on whose behalf the proxy is to be voted ("Conflict").

8.2. By way of example, Conflicts may exist in situations where the Firm is called to vote on a proxy involving an issuer or proponent of a proxy proposal regarding the issuer where MacKay Shields or an affiliated person of the Firm also:

- Manages the issuer's or proponent's pension plan;
- Administers the issuer's or proponent's employee benefit plan;
- Provided brokerage, underwriting, insurance or banking services to the issuer or proponent; or
- Manages money for an employee group.

Additional Conflicts may exist, among others, if an executive of the Firm or its control affiliates is a close relative of, or has a personal or business relationship with:

- An executive of the issuer or proponent;
- A director of the issuer or proponent;
- A person who is a candidate to be a director of the issuer;
- A participant in the proxy contest; or
- A proponent of a proxy proposal.

8.3 Whether a relationship creates a Conflict will depend on the facts and circumstances. Even if these parties do not attempt to influence the Firm with respect to voting, the value of the relationship to MacKay Shields or an affiliate can create a Conflict.

8.4 After a Proxy Vote Override/Decision Form is completed pursuant to Sections 6 or 7, such Form, which elicits information as to whether a potential Conflict exists, must be submitted to the Legal and/or Compliance Departments for review. If the Firm's General Counsel ("GC"), Chief Compliance Officer ("CCO") or their designee determines that there is no potential Conflict, the GC, CCO or their designee, may instruct ISS to vote the proxy issue as set forth in the completed Form.

8.5 If the GC, CCO or their designee determines that there exists or may exist a Conflict, he or she will refer the issue to the Compliance Committee for consideration by convening (in person or via telephone) an emergency meeting of the Compliance Committee. For purposes of this Policy, a majority vote of those members present shall resolve any Conflict. The Compliance Committee will consider the facts and circumstances of the pending proxy vote and the potential or actual Conflict and make a determination as to how to vote the proxy – i.e., whether to permit or deny the recommendation of the portfolio manager, or whether to take other action, such as delegating the proxy vote to an independent third party or obtaining voting instructions from clients.

8.6 In considering the proxy vote and potential Conflict, the Compliance Committee may review the following factors, including but not limited to:

- The percentage of outstanding securities of the issuer held on behalf of clients by the Firm.
- The nature of the relationship of the issuer or proponent with the Firm, its affiliates or its executive officers.
- Whether there has been any attempt to directly or indirectly influence the portfolio manager's decision.
- Whether the direction (for or against) of the proposed vote would appear to benefit the Firm or a related party.
- Whether an objective decision to vote in a certain way will still create a strong appearance of a Conflict.

MacKay Shields may not abstain from voting any such proxy for the purpose of avoiding Conflict.

9. **Securities Lending**

If MacKay Shields portfolio managers or their designees become aware of an upcoming shareholder meeting where there is an important vote to be taken, or become aware of a request for consent of security holders on a material matter affecting the investment, MacKay Shields will consider whether to request that clients call back securities loans, if applicable. In determining whether to request that clients call back securities loans, the relevant portfolio manager(s) shall consider whether the benefit to the client in voting the matter or giving or withholding consent outweighs the benefit to the client in keeping the security on loan. There may be instances when MacKay Shields may not be aware of the upcoming shareholder meeting or request for consent with sufficient time in advance to make such a request, or when MacKay Shields' request that a client call back a securities loan in sufficient time to vote or give or withhold consent may not be successful.

10. **Reporting**

Upon request, MacKay Shields shall report annually (or more frequently if specifically requested) to its clients on proxy votes cast on their behalf. MacKay Shields will provide any client who makes a written or verbal request with a copy of a report disclosing how MacKay Shields voted securities held in that client's portfolio. The report will generally contain the following information:

- The name of the issuer of the security;
- The security's exchange ticker symbol;
- The security's CUSIP number;
- The shareholder meeting date;
- A brief identification of the matter voted on;
- Whether the matter was proposed by the issuer or by a security holder;
- Whether MacKay Shields cast its vote on the matter on behalf of the client;
- How MacKay Shields voted on behalf of the client; and
- Whether MacKay Shields voted for or against management on behalf of the client.

11. **Record-Keeping**

Either MacKay Shields or ISS as indicated below will maintain the following records:

- A copy of the Policy and MacKay's Standard Guidelines and Custom Guidelines;

- A copy of each proxy statement received by MacKay Shields or forwarded to ISS by the client’s custodian regarding client securities;
- A record of each vote cast by MacKay Shields on behalf of a client;
- A copy of all documents created by MacKay Shields that were material to making a decision on the proxy voting (or abstaining from voting) of client securities or that memorialize the basis for that decision including the resolution of any Conflict, a copy of all guideline override requests and all supporting documents; an
- A copy of each written request by a client for information on how MacKay Shields voted proxies on behalf of the client, as well as a copy of any written response by MacKay Shields to any request by a client for information on how MacKay Shields voted proxies on behalf of the client; records of oral requests for information or oral responses will not be kept.

Such records must be maintained for at least eight years, the first two years in an appropriate office of MacKay Shields.

12. Review of Voting and Guidelines

As part of its periodic reviews, MacKay Shields’ Compliance Department will conduct an annual review of the prior year’s proxy voting as well as the guidelines established for proxy voting. Documentation shall be maintained of this review and a report setting forth the results of the review will be presented annually to the Compliance Committee. In addition, MacKay Shields’ Compliance Department maintains a list of non-voting accounts.

13. How to Request Information On How the Firm Voted Proxies

Clients may, at anytime, request and receive information from MacKay Shields as to how the Firm voted proxies for securities held in their account. Any such proxy information request should be in writing to:

MacKay Shields LLC
 1345 Avenue of the Americas New
 York, NY 10105
 43rd Floor
 Attention: Head of Client Services

Exhibits:
