**IMPORTANT DISCLOSURE:** You should not draw any conclusions about the Fund's investment performance from the amount of this distribution or from the terms of the Fund's Plan. The Fund estimates that it has distributed more than its income; therefore, a portion of your distribution may be a return of capital. A return of capital may occur for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with 'yield' or 'income.' The amounts and sources of distributions reported in this Notice are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for accounting and/or tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Set forth in the table below is information relating to the Fund's performance based on its net asset value (NAV) for certain periods.

Annualized current distribution rate expressed as a percentage of NAV as of December 31, 2017 <sup>1</sup>	9.10%
Cumulative total return at NAV for the fiscal year through December 31, 2017 <sup>2</sup>	2.64%
Cumulative fiscal year to date distribution rate as a percentage of NAV as of December 31, 2017	4.10%

<sup>1</sup> The annualized current distribution rate is the cumulative distribution rate annualized as a percentage of the Fund's NAV as of December 31, 2017.

<sup>2</sup> Cumulative total return at NAV is the percentage change in the Fund's NAV for the period from the beginning of its fiscal year to December 31, 2017 including distributions paid and assuming reinvestment of those distributions.

While the NAV performance may be indicative of the Fund's investment performance, it does not measure the value of a shareholder's investment in the Fund. The value of a shareholder's investment in the Fund is determined by the Fund's market price, which is based on the supply and demand for the Fund's shares in the open market. Past performance does not guarantee future results. **Shareholders should not draw any conclusions about the Fund's investment performance from the amount of this distribution or from the terms of the Fund's Managed Distribution Plan.**

Furthermore, the Board of Directors reviews the amount of any potential distribution and the income, capital gain or capital available. The Board of Directors will continue to monitor the Fund's distribution level, taking into consideration the Fund's net asset value and the financial market environment. The Fund's distribution policy is subject to modification by the Board of Directors at any time. The distribution rate should not be considered the dividend yield or total return on an investment in the Fund.
